Pool + Spa

2024

## Pool edge systems

The appropriate pool edge systems for all types of pools (competition pools, leisure and adventure pools etc.). Information on the pages 16 - 77.

## Around the pool

Products for underwater areas and pool surrounds in a great variety of formats and surfaces. Information on the pages 118 - 217.

## Designing with mosaics

Small formats for individual designs – in an enormous diversity of colors and designs. Information on the pages 218 - 247.

## Convincing arguments in favour of swimming pool ceramics from AGROB BUCHTAL

- Decades of experience with swimming pool ceramics for highest demands
- Advice regarding application techniques and relief of routine tasks by AGROB BUCHTAL's in-house planning department
- Hytect technology for easy cleaning, antibacterial effect and elimination of air pollutants
- Accident prevention thanks to graded slip resistance with the GRIP quality seal, absolutely easy to clean
- Greatest design freedom possible thanks to an enormous variety of colors and formats and the possibility of individual special productions
- Special pool edge systems for the most diverse types of use
- Perfectly matched accessories for solutions from one single source
- Cost-effective solutions for all types and sizes of swimming pools
- Maximum resistance of ceramics also in case of saline and sulphate thermal waters

# Showers + Changing rooms

Freedom in color, decoration and format

The design of a swimming pool does not end at the pool edge. The aesthetic overall picture includes the consistent design of showers, changing rooms, foyers and also restaurants. There in particular, it is important to be able to freely combine different formats within a color system.

This is possible with the modular color system of Chroma and Plural. The range extends from mosaics, narrow strip tiles in various lengths to large formats. Rooms and surfaces can thus be scaled, elegantly proportioned and rhythmized. This makes it possible to design wall and floor surfaces across rooms.

# Wellness + Spa

Natural wellness landscape  
for highest demands

Spas and wellness oases are places of tranquillity and are designed for relaxing body and soul. With sweeping views of landscapes, analogies to pristine elements and natural materials, nature can be transferred to the room. Likewise with organic, original forms. They are reminiscent of soft formations or flowing movements of nature. Like that of water, for example. Smallest mosaic tiles, whether round or square, follow these forms and cover even the smallest curves like a skin.

In addition, the guests expect maximum hygiene and cleanliness in wellness and spa facilities. Ceramic tiles provided with Hytect help operators to achieve this goal in an environmentally friendly way. The surface of Hytect ceramics releases active oxygen naturally in interaction with light. This active oxygen inhibits the growth of mould and bacteria directly on the surface.

# Hytect

## Hydrophilic tiles for perfect hygiene

Wherever perfect hygiene is in demand, Hytect proves its worth. The tile coating for wall and floor tiles offers three advantages which are essential for swimming pool construction: it has an antibacterial effect, is extremely easy to clean and eliminates disagreeable odours.

Surfaces in swimming pools and spas are permanently exposed to water. Humid and warm ambient conditions are ideal for the growth of algae, fungi or germs, and it requires considerable time and effort especially in public swimming pools to maintain a high hygiene standard. With Hytect, AGROB BUCHTAL developed an effective solution for being able to design swimming pools which are hygienically clean, easy-care and odourless right from the beginning.

The technology is ecological and economical, because it relies on the natural power of the elements and makes use of something which virtually is available always and everywhere: light. The coating, which is unique in this form, is practically indestructible and ensures a clean ambience in the long term.

### Hytect – the innovative solution

Hytect tiles can make an important contribution to hygiene and economic efficiency, because they help to

- impede the growth of mould, bacteria and other microorganisms,
- further facilitate the cleaning of the surface,
- eliminate air pollutants and odours in indoor areas.

And all that solely by the effect of light!

Ägeribad, Oberägeri, Switzerland

# POOL EDGE SYSTEMS

## The right edge for every pool

Not all baths are the same: different types of use of sports, leisure and adventure pools, therapy baths, private and hotel pools or sports and competition pools require different pool planning concepts. They all demand a sophisticated design of the pool and its surround. This works with modularly combinable components. In addition to tiles for the surfaces, this also applies to ceramic pool edge systems. They are made of solid stoneware without cavities and are therefore particularly robust. Besides the classics, the range also includes innovations such as the energy-saving Bamberg system as well as a completely new prefabricated pool edge with a core made of carbon-reinforced concrete: AGROB BUCHTAL CarboCeram.

## The pool edge systems at a glance

System  
Finnland

System  
Finnland II

System  
Wiesbaden

Sloping, beach-like pool edge with handhold-piece; covered channel with covered gutter tile and outlet valve SILENT 100.

Sloping, beach-like pool edge with handhold-piece and inclined grooved tile; covered channel with covered gutter tile and outlet valve SILENT 100.

Large overflow channel with handhold-piece, cover grating and outlet valve SILENT W 2000.

### Type of pool

Sports and competition pools, leisure and adventure pools, open-air swimming pools.

Sports and competition pools, leisure and adventure pools, open-air swimming pools.

Leisure and adventure pools, thermal baths, open-air swimming pools.

### Advantages for users and operators

Minimal wave rebound thanks to beach-like pool edge; different channel volumes (as required) are possible, easy exit due to elevated water level.

Minimal wave rebound thanks to beach-like pool edge; different channel volumes (as required) are possible, easy exit due to elevated water level.

Rational design thanks to large overflow channel, which combines all requirements (overflow edge, handhold-piece, channel, support for cover grating).

### Variants \*

Thanks to 150 mm and 119 mm wide special pieces and arrangement in several rows, different widths can be realized, also applicable in areas of radii. With the internal corner, the water circulation in corner areas can be optimized. In the case of this version, the corners are easier to clean. When used in private pools, also possible with ceramic channel cover.

Inclined grooved tile for simplified concrete construction, reduction of the number of joints in case of 50 cm long special pieces.

Large channel with mosaic recess, "low-noise channel" Wiesbaden Silent, small channel.

### Available accessories

Outlet valve Silent 100, AGROB BUCHTAL plastic cover gratings.

Outlet valve Silent 100, AGROB BUCHTAL plastic cover gratings.

Outlet valve Silent W 2000, transverse grating in light-grey and white, special colors possible. "Inclined gratings" for the reduction of differences in height in areas of stairs and ramps.

\* Special colors on request.

System  
Wiesbaden Stil

Large overflow channel with handhold-piece, ceramic channel cover and outlet valve SILENT W 2000.

Private and hotel pools.

Particularly aesthetic: channel cover made of ceramics in the same look as the covering of the pool surround. Aesthetically appealing design of the handhold-piece.

On request, also available with mosaic recess.

Outlet valve Silent W 2000.  
Ceramic channel cover 2.0.

System  
Wiesbaden  
decreased water level

Large overflow channel with handhold-piece.

Private and hotel pools.

Particularly aesthetic: the version with decreased water level permits an additional "accumulation height" which is desired above all for the use of water attractions. Thus, this system is optimally suitable, for example, for pools with water slides.

Different channel cross-sections and dimensions expand the application possibilities, among other things, in case of elevated pool walls in flow channels.

Outlet valve Silent W 2000.

System  
Wiesbaden,  
therapy pools

Small overflow channel (without cover grating) with outlet valve SILENT W 2000.

Therapy pools,  
pools with water slides etc.

In case of therapeutic applications, the system allows back-friendly working with the patient.

In case of therapeutic applications, the system allows back-friendly working with the patient.

Outlet valve Silent W 2000.

## The pool edge systems at a glance

System Bamberg

System St. Moritz

System Berlin

Large overflow channel with handhold-piece, outlet (Ø 75 mm), without cover grating.

Elevated pool edge system with handhold-piece; overflow via the outside walls into a channel with cover grating.

Elevated overflow edge as an ideal handhold; covered channel with "smooth" water inflow.

### Type of pool

Leisure and adventure pools, thermal baths, private and hotel pools.

Leisure and adventure pools, private and hotel pools.

Leisure and adventure pools.

### Advantages for users and operators

Consistent look through to the pool edge, as there are no cover gratings; low water consumption and considerably lower energy requirement; low noise level; rational design thanks to large overflow channel.

Lower foundation depth required, "elevated" pool, special "view" (Infinity Pool), different channel volumes (as required) are possible.

Overflow channel (cover grating) directly borders the pool; therefore, an alternative to the Wiesbaden channel; however, different channel volumes (as required) are possible.

### Variants \*

Different colors for handhold-piece and channel are possible; special colors are possible after a check.

Any pool edge widths and edge covers can be realized.

Different channel variants (width, depth) are possible.

### Available accessories

Outlet valve Silent W 2000.

Outlet valve Silent 100, AGROB BUCHTAL plastic cover gratings.

Outlet valve Silent 100, AGROB BUCHTAL plastic cover gratings.

\* Special colors on request.

System Zürich

System Skimmer

Elevated overflow edge as an ideal handhold; covered channel with covered gutter tile and outlet valve SILENT 100.

With pool edging tile Residence.

Leisure and adventure pools.

Private pools.

Different channel volumes (as required) are possible.

“Simple” rough concrete body, minimal effort for water technology (number of pipes).

Different pool edging tiles and channel variants are possible.

Pool edge designs with different special pieces are possible.

Outlet valve Silent 100, AGROB BUCHTAL plastic cover gratings.

### All-rounder with beach effect

The Finland system and its variant Finland II are characterized by great versatility: both are ideally suited for sports and competition pools, adventure and open-air swimming pools. The sloping, beach-like pool edge reduces wave rebound and, in combination with the outlet valve Silent 100, helps to reduce the noise level in indoor swimming pools.

#### **System Finland (classic)**

The pool edge system with the sloping pool edge, which has been tried and tested for decades in a wide variety of pools, has an integrated handhold-piece and can also be used in radial areas. The elevated water level makes it easier for pool users to get out of the pool. Different channel volumes are possible depending on requirements.

# Finnland (classic)

Thanks to 150 and 119 mm wide special pieces and arrangement in several rows, different widths can be realized. The outlet valve Silent 100 and plastic cover gratings are available as accessories. If used in private pools, a ceramic channel cover can also be used.

You will find the individual tiles and special pieces (= model numbers) of this system under:

- 18120H = Chroma tile (page 148)
- 55730 = Handhold-piece (page 25)
- 53130 = Grooved tile (page 106)

## A classic rethought

The further development of the world-wide popular classic Finland (cf. p. 22 ff) is just as universally applicable. An important difference in detail is the inclined grooved tile. Its wedge-shaped longitudinal section decisively facilitates the construction of the concrete structure: the upper side of the pool wall can be executed horizontally. The grooved tile then provides the necessary slope towards the pool. Reduced wave action and the elevated water level ensure increased comfort during swimming and when leaving the pool here, too. The 500 mm long special pieces, which reduce the number of joints, also speak in favour of Finland II. Instead of the standard plastic cover gratings, the use of ceramic channel covers is also possible for private pools (see system Wiesbaden Stil on p. 42 ff).

# Finnland II (inclined grooved tile)

You will find the individual tiles and special pieces (= model numbers) of this system under:

- 42550HK = Chroma tile (page 148 ff)
- 55831 = Handhold-piece (page 31)
- 55841 = inclined grooved tile (page 32)
- 18120H = Chroma tile (page 148 ff)
- 59681 = Coved gutter tile with outlet (page 113)
- 18210H = Chroma strip tile (page 148 ff)
- 37011 = Shank-tile (page 113)
- Cover grating (page 84)
- Outlet valve Silent 100 (page 86)

**Legend:**

- 01 UW-Silicone
- 02 Closed-cell polyethylene foam round lace
- 03 Elastic water-resistant filling material
- 04 Joint band
- 05 Slide bearing

- 06 AGROB BUCHTAL plastic cover grating
- 07 Capillary barrier/grouting (reaction resin filler)
- 08 Waterproof concrete (according to DIN EN 206/DIN 1045/DAfStB WU Guideline)
- 09 Conventional thick-bed laying
- 10 Thin-bed laying on cement render (P III, CS IV without added lime)
- 11 Sealing layer
- 12 Sealing tape
- 13 Outlet valve „Silent W 2000“ of AGROB BUCHTAL
- 14 Air inlet pipe for outlet „Silent 100“
- 15 Epoxi for joints (for the projekt sector)
- 16 AGROB BUCHTAL section stoneware pipe
- 17 Casing for water inlet/outlet pipe and brazing collar

## Whispering specialists

With four different versions, the Wiesbaden system also meets special requirements, for example for therapy pools or flow channels. Equipped with the outlet valve Silent W 2000, Wiesbaden audibly reduces the noise level in indoor swimming pools.

### **Pool edge system Wiesbaden with elevated water level**

Proven in leisure and adventure pools as well as in thermal and open-air pools, this system is convincing, among other things, because of its rational design. The large overflow channel combines all requirements in a single construction element: overflow edge, handhold-piece and channel. This saves time and money in pool construction. Like all AGROB BUCHTAL pool edge systems, the Wiesbaden overflow channel is manufactured without cavities and is therefore particularly robust.

# Wiesbaden with elevated water level

You will find the individual tiles and special pieces (= model numbers) of this system under:

- 18120H = Chroma tile (page 148 ff)
- 85160 = Overflow channel (page 37)
- 85161 = Overflow channel with outlet (page 37)
- Cover grating (page 84)
- Outlet valve Silent W 2000 (page 86)

**Legend:**

- 01 UW-Silicone
- 02 Closed-cell polyethylene foam round lace
- 03 Elastic water-resistant filling material
- 04 Joint band
- 05 Slide bearing
- 06 AGROB BUCHTAL plastic cover grating
- 07 Capillary barrier/grouting (reaction resin filler)

- 08 Waterproof concrete (according to DIN EN 206/DIN 1045/DAfStB WU Guideline)
- 09 Conventional thick-bed laying
- 10 Thin-bed laying on cement render (P III, CS IV without added lime)
- 11 Sealing layer
- 12 Sealing tape
- 13 Outlet valve „Silent W 2000“ of AGROB BUCHTAL
- 14 Air inlet pipe for outlet „Silent 100“
- 15 Epoxi for joints (for the projekt sector)
- 16 AGROB BUCHTAL section stoneware pipe
- 17 Casing for water inlet/outlet pipe and brazing collar

The products shown on this page can also be produced in other colors of the series Chroma non-slip. We will be pleased to check the possibility of such a special production upon request.

<sup>1</sup> Also available with rounded front edge for areas provided for ladders.

<sup>2</sup> For the matching outlet valve "Silent W 2000", refer to page 86

<sup>3</sup> Model 85161 also available with outlet Ø 100 mm (=model 551312)

<sup>4</sup> For reasons of production, differences in color between special pieces and standard tiles can occur.

Conic cuts for the products shown on this page are possible upon request.  
No pallet rebate is granted for the products shown on this page.

## Wiesbaden Silent

The special version "low-noise channel" Wiesbaden Silent is a development for considerably reducing the noise level. Compared to a conventional Wiesbaden channel, it is reduced by approx. 10 dBA at a water quantity of 6 m<sup>3</sup>/h per 1 m of channel. This solution is based on a complex combination of channel shape, arrangement of cover gratings and specially designed supporting strip for the gratings.

You will find the individual tiles and special pieces (= model numbers) of this system under:

18120H = Chroma tile (page 148 ff)  
 85160 = Overflow channel (page 39)  
 85161 = Overflow channel with outlet (page 39)  
 Cover grating (page 84)  
 Outlet valve Silent W 2000 (page 86)

**Legend:**

01 UW-Silicone  
 02 Closed-cell polyethylene foam round lace  
 03 Elastic water-resistant filling material  
 04 Joint band  
 05 Slide bearing  
 06 AGROB BUCHTAL plastic cover grating  
 07 Capillary barrier/grouting (reaction resin filler)

08 Waterproof concrete (according to DIN EN 206/DIN 1045/DAfStB WU Guideline)  
 09 Conventional thick-bed laying  
 10 Thin-bed laying on cement render (P III, CS IV without added lime)  
 11 Sealing layer  
 12 Sealing tape  
 13 Outlet valve „Silent W 2000“ of AGROB BUCHTAL  
 14 Air inlet pipe for outlet „Silent 100“  
 15 Epoxi for joints (for the projekt sector)  
 16 AGROB BUCHTAL section stoneware pipe  
 17 Casing for water inlet/outlet pipe and brazing collar

<sup>1</sup> For the matching outlet valve "Silent W 2000", refer to page 86

<sup>2</sup> Matching mosaic: see series Plural, Fresh

<sup>3</sup> For reasons of production, differences in color between special pieces and standard tiles can occur.

Conic cuts for the products shown on this page are possible upon request.  
No pallet rebate is granted for the products shown on this page.

 The products shown on this page can also be produced in other colors of the series Chroma non-slip. We will be pleased to check the possibility of such a special production upon request.

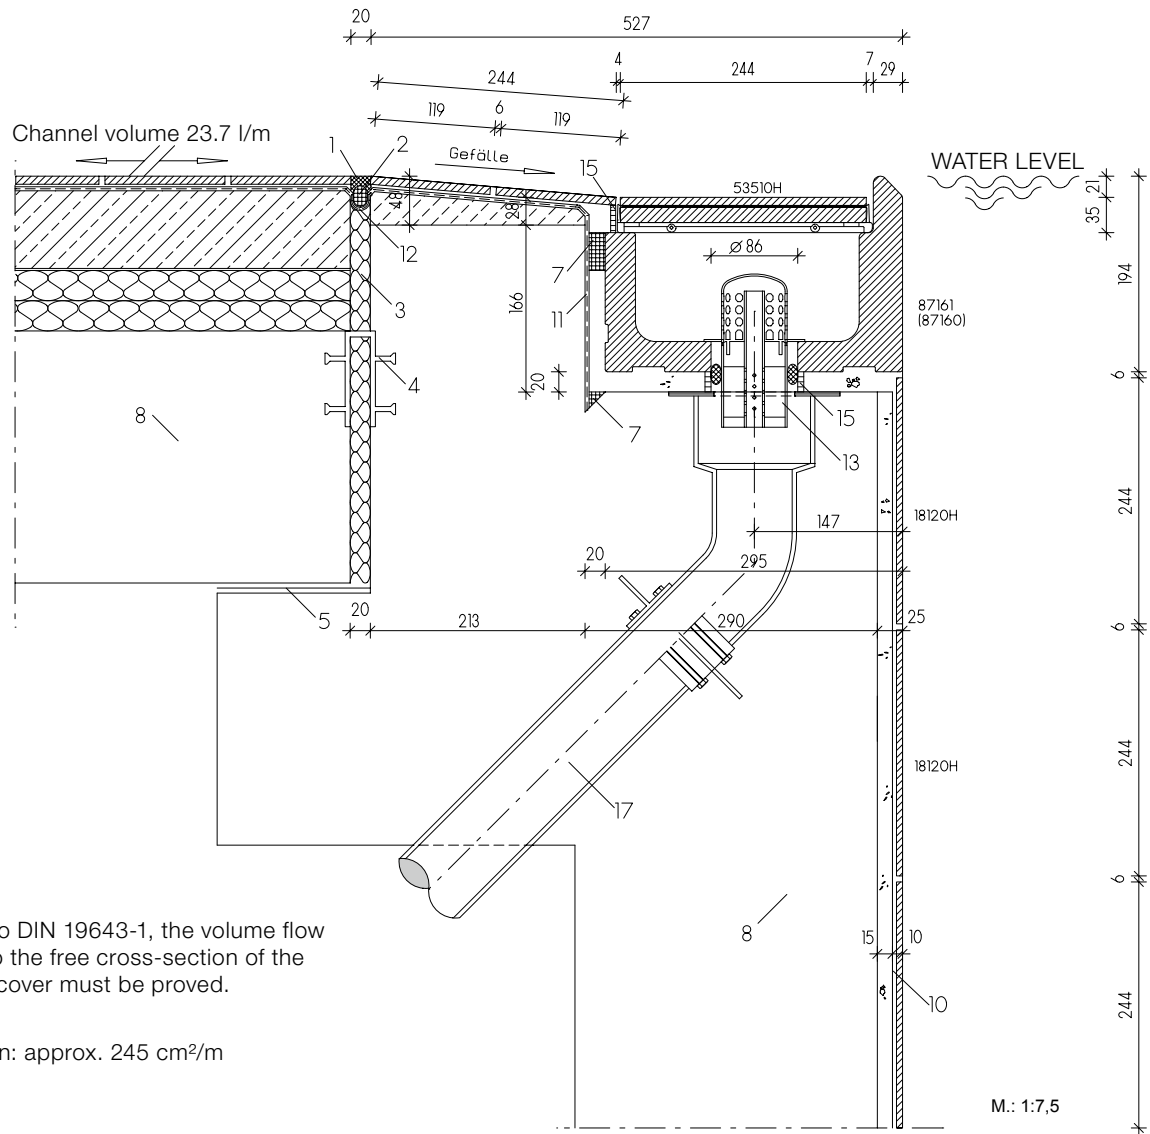

### With a clear edge

The pool edge system Wiesbaden Stil is an elegant variation of the classic: the large overflow channel with handhold-piece is covered with a ceramic channel cover. Wiesbaden Stil is also available with mosaic recess on request. The ceramic channel cover enables a uniform design of the pool edge in the case of private and smaller hotel pools. The cover is easy to lay thanks to plug-in connections. The ceramic channel cover is slip-resistant, very robust and, on request and after a check, available in different formats and partly also for free shapes. Water flow rate: free cross-section of 245 cm<sup>2</sup>/m in case of standard hole pattern.

# Wiesbaden Stil

Note: according to DIN 19643-1, the volume flow rates in relation to the free cross-section of the ceramic channel cover must be proved.

Free cross-section: approx. 245 cm<sup>2</sup>/m

You will find the individual tiles and special pieces (= model numbers) of this system under:

- 18120H = Chroma tile (page 148 ff)
- 85160 = Overflow channel (page 45)
- 85161 = Overflow channel with outlet (page 45)
- 53510H = Ceramic channel cover (page 80)
- Outlet valve Silent W 2000 (page 86)

<sup>1</sup> Also available with rounded front edge for areas provided for ladders.

<sup>2</sup> For the matching outlet valve "Silent W 2000", refer to page 86

<sup>3</sup> Matching mosaic: see series Plural S. 183 ff

<sup>4</sup> For reasons of production, differences in color between special pieces and standard tiles can occur.

Conic cuts for the products shown on this page are possible upon request.  
No pallet rebate is granted for the products shown on this page.

The products shown on this page can also be produced in other colors of the series Chroma non-slip. We will be pleased to check the possibility of such a special production upon request.

## Specialist for attractions

The version with decreased water level permits an additional "accumulation height" which is desired above all for the use of water attractions. Thus, this system is optimally suitable for slide landing pools, for example.

Different channel cross-sections and dimensions extend the application possibilities, for example, in case of elevated pool walls in flow channels. Among other things, the outlet valve Silent W 2000 is available as an accessory.

# Wiesbaden with decreased water level

You will find the individual tiles and special pieces (= model numbers) of this system under:

- 18120H = Chroma tile (page 148 ff)
- 55100 = Overflow channel (page 49)
- 55101 = Overflow channel with outlet (page 49)
- S50038 = Pool edging tile (like 55450 with glazed lower edge, page 92)
- Outlet valve Silent W 2000 (page 86)

**Legend:**

- 01 UW-Silicone
- 02 Closed-cell polyethylene foam round lace
- 03 Elastic water-resistant filling material
- 04 Joint band

 The products shown on this page can also be produced in other colors of the series Chroma non-slip. We will be pleased to check the possibility of such a special production upon request.

In the version with small overflow channel without cover, Wiesbaden with decreased water level is primarily designed for the use in therapy facilities. In combination with an elevated pool edge, this results in a back-friendly effect for the staff, who can work with the patients without having to constantly adopt a stooped posture.

Therapy pool DRK-Krankenhaus (hospital), Langen-Debstedt, Germany / Architect: Westphal u. Partner Architekten

- 15 Epoxi for joints (for the projekt sector)
- 16 AGROB BUCHTAL section stoneware pipe
- 17 Casing for water inlet/outlet pipe and brazing collar

## Sustainable innovation

Developed for Germany's first swimming pool satisfying the passive house requirements, the pool edge system Bamberg is convincing above all because of reduced water evaporation and a considerable decrease of the energy requirement. Additional advantages: elegant look without cover gratings and low noise level.

The versatile system shows its qualities in leisure and adventure pools just as well as in thermal, private and hotel pools. The large overflow channel with integrated handhold-piece makes cover gratings superfluous, directly adjoins the pool surround and thus creates a uniform overall picture. The profile of the overflow channel was developed in extensive, scientifically supervised tests.

# Bamberg

While the splash water increases the evaporation rate in the case of conventional systems, the Bamberg Channel effects a considerable reduction thanks to its sophisticated design and thus makes an important contribution to energy saving: heat losses are reduced, the ventilation systems must circulate less air and thus consume less electricity. Bamberg offers additional possibilities for individual design by different colors for the handhold-piece and the channel, and special colors are also possible after a check.

You will find the individual tiles and special pieces (= model numbers) of this system under:

- 18120H = Chroma tile (page 148 ff)

<sup>1</sup> For the matching outlet valve "Silent W 2000", refer to page 86

<sup>2</sup> For reasons of production, differences in color between special pieces and standard tiles can occur.

<sup>3</sup> Please note: due to the shaping, external angles are not possible.

Conic cuts for the products shown on this page are possible upon request.  
No pallet rebate is granted for the products shown on this page.

The products shown on this page can also be produced in other colors of the series Chroma non-slip. We will be pleased to check the possibility of such a special production upon request.

## Bathing pleasure with panoramic view

The characteristic feature of the pool edge system St. Moritz is the elevated pool edge. This results in advantages not only with regard to pool construction. The bathers enjoy the view from their elevated position compared to the conventional construction method.

The system with integrated handhold-piece is tailored to the requirements of leisure and adventure pools, but also proves its worth in private and hotel pools. In the case of this construction, overflowing water flows down the outer walls of the pool into the channel on the outside, which is covered by a plastic grating. Cost advantages result above all from the lower foundation depth for the pool.

Hotel aja, Garmisch-Partenkirchen, Germany / Architect: SMAP SEEGER MÜLLER Berlin (Germany) und Büro Korb, Hamburg (Germany)  
Series: Quarzit / Photo: Fotodesign Peters

# St. Moritz

With the system St. Moritz, any pool edge widths with different edge covers can be realized. However, the "elevated" pool is also attractive for the bathers: they have an unobstructed view of the surroundings and can communicate with people outside the pool almost at eye level.

You will find the individual tiles and special pieces (= model numbers) of this system under:

- 18120H = Chroma tile (page 148 ff)
- 55830 = Handhold-piece (page 31)
- 342580HK = Quarzit grid profile tile (page 209)
- 37120 = Profiled edging (page 99)
- 342550HK = Quarzit tile (page 209)
- 37017 = Inclined shank-tile (page 113)

- 15 Epoxi for joints (for the projekt sector)
- 16 AGROB BUCHTAL section stoneware pipe
- 17 Casing for water inlet/outlet pipe and brazing collar

### Flexible alternative

In the case of this system, the elevated overflow edge is designed as a handhold. The covered channel, which collects the overflowing water, is located – viewed from the pool – directly behind it and ensures a smooth, low-noise water inflow thanks to its rounded shape.

Due to its design, the system Berlin is suitable for use in leisure and adventure pools, among others. With the overflow channel directly adjacent to the pool it can be considered as an alternative to the pool edge system Wiesbaden, but offers the advantage of greater flexibility: the width and depth of the channel are variable in the case of the pool edge system Berlin and can be exactly adapted to the local conditions.

Indoor swimming pool, Münster-Kinderhaus, Germany / Architect: Janßen Bär Partnerschaft  
Series: Pool edge system Berlin, Chroma, Unique, Valley / Photo: Stephan Brendgen

# Berlin

Plastic channel covers are available as accessories. The outlet valve Silent 100 from AGROB BUCHTAL, which is also suitable for combination with the system Berlin, helps to effectively reduce the noise level in the pool.

You will find the individual tiles and special pieces (= model numbers) of this system under:

18120H = Chroma tile (page 148 ff)  
 55800 = Pool edging tile (page 93)  
 37031 = Supporting angle for grating (page 113)  
 Cover grating (page 84)

17 Casing for water inlet/outlet pipe and brazing collar

## Designing with edging tiles

Like the pool edge system Berlin (presented on page 63), the Zürich system also has an elevated overflow edge, which serves as a handhold at the same time. However, the channel, which is covered with a plastic grating, is separated from the pool by edging tiles.

Thanks to the combination with pool edging tiles between the overflow edge and the drainage channel, the system is perfectly suitable for use in leisure and adventure pools. In addition, Zürich offers immense scope in terms of construction technique and aesthetic aspects. Thus, different channel volumes can be realized, depending on the requirements.

## Low budget for private swimming pools

Wherever a low-cost solution for private pools is in demand, the Skimmer system is an ideal solution. For the water technology, only little effort is required. In terms of design, Skimmer offers individual freedom by different designs of the pool edge and the choice of suitable special pieces.

## Ceramics on the outside, carbon-reinforced concrete core

The new prefabricated parts for the refurbishment of older pool edges ensure very simple and time-saving construction processes. In addition, they enable long-lasting, resource-efficient and therefore sustainable renovation solutions.

In cooperation with the engineering service provider CARBOCON from Dresden, which is experienced in the field of the innovative building material carbon-reinforced concrete, AGROB BUCHTAL has developed a completely new renovation solution: a pool edge completely prefabricated with tiles and a core made of carbon-reinforced concrete.

## Advantages of prefabrication

The prefabrication of the pool edges under controlled and quality-monitored workshop conditions enables energy- and resource-efficient production processes and minimized waste quantities – and a product quality which can not be achieved on construction sites. But also the construction processes on site are much simpler with the prefabricated parts because complicated work steps and the involvement of many different trades are not required. The overall construction time is also reduced because formwork, pouring and drying of the in-situ concrete are no longer necessary. To further improve the carbon footprint, AGROB BUCHTAL relies on short delivery routes and has the prefabricated parts produced with reusable formwork.

## Pool edges as ceramic prefabricated parts: simple and quick installation on site

To be able to install the prefabricated parts, which usually are 2.5 metres long, the old pool edges, independent of the manufacturer or type, are cut out first of all. The result is precise horizontal and vertical cutting edges onto which – after pre-treatment of the cut steel reinforcement and sealing of the cut surface – the new prefabricated pool edges are simply placed in mortar. The position of existing channel drains is measured project-specifically and taken into account at the production of the prefabricated parts. Finally, the connection works to the pool surround (such as e.g. capillary barrier) and to the pool tiles are carried out. As the transition to the existing pool tiles – provided that these are retained – is considerably below the water level, possible differences in color between the tiles and the joints are hardly visible, so that the pool appear as a uniform whole as before.

Detailed information and prices on request.

## Ceramic channel cover for private and hotel pools

Exclusive design options are opened up by the pool edge system "Wiesbaden Stil": by using the ceramic channel cover, the entire pool surround inclusive of the pool edge can be designed in a uniform look. The colors and the special surfaces of the tile series Area Pro, Ascona, Quarzit, Valley and Emotion are available. The supports and base plates of the channel cover are also supplied in matching colors. The cover is slip-resistant and very robust. Plug-in connections ensure quick and easy laying. On request, different formats and free forms are also available. Water flow rate: free cross-section 245 cm<sup>2</sup>/m in case of the standard hole pattern.

## Top-quality cover gratings

Even with regard to details which are often hardly noticed, high quality pays off: cover gratings from AGROB BUCHTAL, available as transverse or parallel gratings, are made of high-quality, high impact strength plastics with UV absorber, connection of the individual slats by means of tear-resistant PUR round cord and intermediate rolls in a color matching the individual slats. The gratings are designed for the loads to be expected by being walked on barefoot. It is almost impossible to break individual rods.

# Swimming pool special pieces

## Variety of practical special pieces

No matter how complex a pool design may be – a variety of well thought-out and solid ceramic special pieces guarantee a problem-free realization. The appropriate pool end pieces can be combined from the various systems according to the modular principle. Special forms such as rounded edges with profiled edgings, skirtings or cove skirtings in diverse designs ensure a minimum risk of injury and maximum ease of cleaning and care as well as robustness.

- Pool edging tiles
- Skirtings
- Profiled edgings

Series: Pool edge system Finland / Photo: Jochen Stüber

## At the pool edge

Pool edging tiles can be found in all pool edge designs at which the edge is not already part of the pool edge system, such as the system Wiesbaden, for example. Or for bordering the pool in places where no drainage channel is provided. They have several functions: in addition to a colored marking of the pool edge both inside and outside the pool, pool edging tiles offer above all a safe hold for the swimmer and therefore are an important safety feature. For different designs of the pool edge, several variants are available, some of which can be used across different types of design.

Terrassenbad, Baden, Switzerland / Architect: Bridevaux M. + Zimmermann M. Architekten AG, Baden / Series: Plural unglazed / Photo: Adriano Faragulo

e.g. for the Systems Zürich, Wiesbaden with decreased water level, "Skimmer" etc.<sup>3</sup>

<sup>1</sup> For cover gratings, refer to page 84, coved gutter tiles refer to page 113

<sup>2</sup> For reasons of production, differences in color between special pieces and standard tiles can occur.

<sup>3</sup> In the case of these special pieces, the overhang and the grooves are glazed in the respective colors.

<sup>4</sup> In the case of these special pieces, the overhang and the grooves are glazed in the respective colors, the tread surface is white (81).

No pallet rebate is granted for the products shown on this page.

 The products shown on this page can also be produced in other colors of the series Chroma and Chroma non-slip. We will be pleased to check the possibility of such a special production upon request.

## Ceramic specialists

The construction of swimming pools requires some very special solutions which cannot be used in any other area of application and which a premium supplier of swimming pool ceramics should have in its product range in order to cover the full spectrum of requirements of swimming pool architecture with a holistic programme. This includes stair tread tiles for pool ladders, letter tiles for indicating pool depths or for marking non-swimmer sections, or gutter tiles for the drainage of areas. All these special tiles are details, which can be found in almost every swimming pool and which would otherwise only be realizable by changing the material, e.g. to stainless steel.

# Around the pool

## Expertise around the pool

Contemporary swimming pool architecture must satisfy high standards. And that not only in terms of design: sports pools, spas and private pools should be comfortable and safe, inexpensive to maintain, easy to clean and permanently hygienic.

Tiles meet these functional requirements: for example, with slip-resistant special surfaces which ensure a safe foothold even when wet. Modularly combinable tiles and special pieces are important for a consistent design from the pool and pool surround to all adjacent areas such as showers, saunas, changing rooms or restaurants.

As algae, moss and microbes feel very much at home in the warm and humid indoor climate of swimming pools, maintaining high hygiene standards often becomes a challenge. The proven Hytect technology of our ceramic tiles solves the problem. It has a permanent antibacterial effect, eliminates unpleasant odours and facilitates cleaning.

Quality ceramics forms the basis of convincing solutions in all the points mentioned above and is therefore superior to other materials such as metal or natural stone. This applies all the more to swimming pool ceramics from AGROB BUCHTAL, because every tile and every special piece contains the experience of decades in which the company has realized tens of thousands of the most diverse sports, leisure and therapy pools world-wide.

Paracelsus Bad & Kurhaus, Salzburg, Austria  
Architect: Berger + Parkkinen / Series: Pool edge system Wiesbaden,  
Savona / Photo: Fotodesign Peters, Amerang

## Slip-resistant and stylish at the pool edge as well

There are special requirements with regard to accident prevention which have to be met by the pool surround. Anyone who walks barefoot on the usually wet pool edge must be protected against the risk of slipping. The tile series from AGROB BUCHTAL, available in XS to XXL formats, offer the legally required slip resistance for accident-free walking into and out of the pool. This is guaranteed by the special "GRIP quality seal". A wide range of different colors and surfaces opens up a great variety of design options.

Design concepts for swimming pools can be consistently realized with tiles from AGROB BUCHTAL at the pool surround as well. The AGROB BUCHTAL range offers a variety of products for small-sized solutions from mini to medium format. The range extends from XS formats (from 2.5 x 2.5 cm in the series Plural non-slip, Plural unglazed, Marble & More, Loop, Fresh) to a wide range of octametric formats of Chroma non-slip and Chroma unglazed through to the 60 x 120 cm large format of the Area Pro series. Decorative surfaces include a variety of series (Area Pro, Ascona, Basic Stone, Emotion, Marble & More, Nova, Quarzit, Savona, Valley).

Most of the products are available with joint widths of 3 and 6 mm. This allows the realization of harmonious transitions from the pool surround to the wider standard joint dimensions of the underwater area. Hytect and the Protecta surface upgrading (depending on the type of material) ensure a permanently attractive appearance and offer economic and ecological advantages thanks to easy cleaning.

## The right edge for every pool

Not all baths are the same: different types of use of sports, leisure and adventure pools, therapy baths, private and hotel pools or sports and competition pools require different pool planning concepts. They all demand a sophisticated design of the pool and its surround. This works with modularly combinable components. Besides tiles for the surface, this also applies to ceramic pool edge systems or special pieces such as profiled edgings, skirtings and cove skirtings. They enable a consistent design of the pool wall, floor and edge.

Large formats with natural-looking surfaces are in demand for the pool surround. And tiles with different slip-resistance classes, which guarantee the legally required standard in swimming pools. An advantage which only high-quality ceramics can offer.

The series listed on the following pages are suitable for use in pool surrounds. Thanks to the variety of colors, formats and looks, they offer enormous architectural design freedom.

Grid profile

Chiemgau Thermen, Bad Endorf, Germany  
Architect: Architekturwerkstatt Zopf, Salzburg, Austria  
Series: Pool edge system Finnland,  
pool edge system St. Moritz, Quarzit  
Photo: Peters Fotodesign, Amerang

The grid profile of the series Ascona, Chroma unglazed and Quarzit is advantageous in two respects: it guarantees the required slip resistance in the pool surround area and at the same time conveys a pleasantly soft barefoot walking feeling. The embossed structure is particularly robust and durable. The finely processed mass gives these tiles a pleasantly velvety surface feel. The tiles give bathers a feeling of safety also visually, as their structure signals a slip-resistant surface.

## Experience diversity

Ascona is made for spas, wellness areas and swimming pools in hotels, but also for private homes. This is also due to the diversity of this series. Already visually, with mosaics and oblong formats, small and large formats for walls and floors as well as the fine selection of colors, one has a wide range for design. However, the series also impresses with its functional possibilities and technical solutions, especially for all swimming pool areas or spas – by the way, indoors and outdoors, in entrance areas as well as in rooms where visitors walk barefoot or in dedicated wet areas. Thanks to clear lines and grounded colors, a wide variety of style worlds can be created. Puristic architecture is just as possible as classic or modern country house designs. The Ascona series can be perfectly combined with our mosaic series Marble & More.

## In its element: Chroma

Especially under water, the demands on the architectural raw material ceramics are great. Chroma bundles all the experience in swimming pool construction in a product series specially designed for underwater use for architects and planners. The standard joint width of 6 mm, which is widely used above all in pool construction, is used.

## Stability in the pool: 6 mm joint

Physical stresses lead to high loads in the pool area, which make a specific joint width advisable. The laying of the tiles with a 6 mm joint ensures maximum safety.

## Safety without compromises

Accident prevention has the highest priority in every swimming pool – especially in areas with a particularly high risk of slipping, such as stairs leading into the water or walk-through pools. That is why Chroma also offers the slip-resistance classes of category "C". In this way, the highest design and safety requirements can be implemented uniformly and without compromise.

<sup>2</sup> Especially suitable for non-slip and clearly visible (stair) edge design.

<sup>3</sup> The cove skirtings comply with DIN EN 14411, group Al<sub>b</sub>, glazed (GL)

## Colorful and flexible

The color range specially developed for Plural comprises 50 colors matched to one another. Whether glazed or unglazed, earthenware, stoneware or porcelain stoneware – the narrow 3 mm joint is just as standard with Plural as the pollutant-reducing Hytect coating and the design in various slip-resistance classes. Thus, Plural can be used in many indoor and outdoor areas: from the facade to the floor, from the underground station to the wellness landscape.

Meerbad Meerbusch, Meerbusch, Germany / Architect: Planteam Ruhr, Gelsenkirchen, Germany / Series: Pool edge system Wiesbaden

Mosaics glued thermoplastically on back of AGROB BUCHTAL can be used not only in dry zones but also without any problems in underwater areas (e.g. swimming pools/whirlpools) as well as in permanently wet areas.

Do you already know our Mosaic Designer at our website [www.agrob-buchtal.com](http://www.agrob-buchtal.com)?

There, you will have the possibility of designing your individual color gradients, mosaic compositions and the laying of pictures.

Floor tile 30 x 60 cm, 12 x 24 in  
smooth, R10/B

Mosaics glued thermoplastically on back of AGROB BUCHTAL can be used not only in dry zones but also without any problems in underwater areas (e.g. swimming pools/whirlpools) as well as in permanently wet areas (e.g. pool surrounds/showers).

Do you already know our Mosaic Designer at our website [www.agrob-buchtal.com](http://www.agrob-buchtal.com)?

There, you will have the possibility of designing your individual color gradients, mosaic compositions and the laying of pictures.

## Natural and lively

Besides its natural look, Quarzit is impressive because of unusual characteristics, which are based on an innovative glazing process. The glaze, which is enriched with a granulate, is applied and durably bonded to the tile body during firing. The result is a surface vividly nuanced by discreet gloss and mica spots in an authentic stone look. In addition to the aesthetic advantages, there are also practical ones: pleasant haptics is combined with high slip resistance and enormous wear resistance.

Hotel aja, Garmisch-Partenkirchen, Germany / Architect: SMAP SEEGER  
MÜLLER Berlin (Germany) and Büro Korb / Series: Pool edge system

<sup>3</sup> On request, also available in a length of 497 mm.

<sup>4</sup> High weight only to carry with two persons.

<sup>5</sup> Minimum order quantity 10 pieces. The price must be calculated individually for orders of less than 10 units.

<sup>6</sup> Short edge rectified

For details to gutter tiles and grooved tiles refer to chapter swimming pool special pieces.

## Elegant and timeless

Structures and colors of various rocks from the Italian coastal region of "Cinque Terre" merge in the Savona floor tile series to create a lively composition of coarsegrained texture and soft layers. A finely dosed granulate application gives the surface a pleasantly stony look and haptics. Mica-like glossy spots underline the natural effect.

# Designing with mosaics

## Visual variety

Ceramic mosaics offer first-class possibilities for realizing architectural ideas individually and functionally. The range of colors and formats and their combinations or also a tone-in-tone design make unusual appearances possible.

This can visually characterize the entire pool and spa project or be used to emphasize specific areas such as stairs and pool edges or to create pictures with mosaics.

The products meet high standards in terms of slip resistance and hygiene - also in underwater and permanently wet areas - and thanks to the many years of collaboration with architects and planners, they offer well thought-out solutions in and around the pool.

Schwaketenbad, Konstanz, Germany  
Architect: Behnisch / Series: Loop / Photo: David Matthiessen

# Decorative details: mosaics

With mosaic tiles, decorative design concepts can also be realized with very small formats. AGROB BUCHTAL offers an extensive range with bold colors and unusual formats for swimming pools and wellness areas.

All mosaics meet the high standards with regard to slip resistance and hygiene – also in underwater, permanently wet areas and steam saunas. This is where the advantages of the thermo-plastic glueing come in useful. Thanks to this new processing method – microbiologically and structural-physically certified – the mosaics satisfy all requirements in and around the pool. In addition, laying is considerably facilitated – compared to the usual film glued on the front side – even in complex areas such as columns or curves thanks to the grid glued on the reverse side.

# Creative particle accelerator

## Free your mind

The new mosaic design tool from AGROB BUCHTAL expands the horizons for architects and interior designers by giving them an infinite number of solutions when it comes to form, color and size. The digital service provides scope for new ideas and is convincing by an excellent user experience thanks to its intuitive, almost playful handling. A tool with which AGROB BUCHTAL is revolutionizing the ancient art of mosaics and bringing it to new life.

By entering the desired basic parameters such as the dimensions of the mosaic surface, selection of product series, tile format and joint color, individual color gradients or color mixtures can be generated automatically. Depending on the size, the desired design is generated and visualized on the screen in the shortest possible time.

103,968 mosaic tiles, each measuring 1 x 1 centimetre, are required for an area of 3 x 6 metres, for example – digitally

arranged and shaped in a flash. There is no limit to the size, which makes the Mosaic Designer from AGROB BUCHTAL a creative accelerator, especially for the design of swimming pools and wellness facilities, restaurants, hotels, schools and public areas such as e.g. underground stations.

There is a choice of the three mosaic series Loop, Fresh and Plural, which are ideal as pure color system series without surfaces such as wood, concrete, marble or the like and offer a wide spectrum of tonal values for the design. Each design can be saved as a project or sent immediately to AGROB BUCHTAL as an inquiry.

In addition to graphic gradients and color mixtures, the Mosaic Designer can also implement individual motifs. Images and photos can be directly uploaded using the upload function.

directly to the Mosaic Designer

## Fresh and modern

Fresh offers a harmonious range of modern, fresh colors in the popular mosaic formats of 2.5 x 2.5 cm and 5 x 5 cm, with which individual, but at the same time uncomplicated to realize designs are possible. A particularly practical advantage is that R10/B and R11/C slip-resistant mosaics in colors matching the tiles are available.

Indoor swimming pool, Höxter, Germany / Architect: Hooper Architects / Series: Fresh, Quarzit / Photo: Jochen Stüber

## Fine and round

The perfect answer to the trend towards soft, rounded designs is the mosaic Loop. It is available in 15 finely nuanced, high-gloss colors, six of which are also available in a matt, slip-resistant version. This extends the range of applications to showers and other wet areas. In addition to the mosaic with a 2 cm diameter, a 1 cm variant is also available, which conveys a particularly filigree and elegant impression. In contrasting colors, it is also suitable for pictograms, letters, arrows and QR codes. Decorative elements made of square and round mosaic tiles and the Ocean decor with undulating color gradient round off the series.

# Wide range

In addition to the series Fresh and Loop presented here, AGROB BUCHTAL also offers other mosaic series for diverse architectural concepts. All information about this is included in the 2024 programme of delivery.

## Amano

Delicately transparent colors and a glossy relief surface in the format of 2.5 x 2.5 cm characterize the series Amano.

## Karl

Craftsmanship and original glazes interpreted in a creative manner – this is what the series Karl offers in two mosaic formats.

## Marble & More

Small-scale aesthetics in marble look - this is Marble & More, which provides great design scope in six colors and the formats of 1 x 1 and 2.5 x 2.5 cm.

# Planning and know-how

Swimming pool expertise in all project phases:

Whether at the research in the laboratory, in the in-house production or on location at the construction site – AGROB BUCHTAL uses its extensive expertise in the swimming pool sector to optimally adapt products and services to the requirements of architects, planners and swimming pool operators. In the service of architecture, AGROB BUCHTAL develops innovative technologies for surface upgrading, realizes individual custom-made products and provides support at routine planning tasks

# In-house planning department

## From professionals for professionals

For more than seven decades, AGROB BUCHTAL's in-house planning department has offered architects and planners competent advice and support at the planning and realization of their projects on request.

A committed team of qualified engineers, architects, designers, technicians and color experts ensures a quick and problem-free realization of individual construction projects. Since 1952, AGROB BUCHTAL has offered this service, which focuses above all on the requirements of architects. The range of services includes laying plans, determinations of quantities, detailed estimates, texts for bidding purposes or project-specific advice regarding application techniques. Upon request, a person to contact will be at your disposal on location.

## Slip resistance from A to C

Slip-resistant tiles for diverse applications are one of the core competences of AGROB BUCHTAL. This is particularly important in the swimming pool sector in order to prevent accidents caused by slipping.

The GRIP quality seal stands for the many years of experience of AGROB BUCHTAL in the field of slip resistance and is supervised by permanent external controls. The first slip-resistant tiles were established in the market by our company more than 80 years ago. Since then, they have been continuously further optimized through intensive research and development work. Today, the use of tiles in barefoot areas with a high risk of accident is subject to special legal regulations. The ceramic series of AGROB BUCHTAL meet these standards and are available in the valuation groups A and B, which are required for swimming pools. For the use under water – for example stairs and walk-through pools – some series also offer variants (decorated and mono-colored) in the slip-resistance category “C”.

From the laboratory into the swimming pool: accident prevention by tested safety

A micro-rough surface ensures a slip-resistant effect and an optimal hold of the soles of the feet in barefoot areas. In addition to high slip resistance, comfortable walking is also guaranteed in this way – without sliding or slipping. The different slip-resistance valuation groups are assigned to the right category by means of the test on the “inclined plane”. The tiles are always tested with different angles of inclination: the higher the angle, the higher the slip resistance.

**Valuation group A**

Barefoot passages and sanitary areas (nearly dry), individual and common dressing rooms, pool floors in non-swimmer areas if the water depth is more than 80 cm in the entire area, sauna and relaxation areas (nearly dry).

**Valuation group B**

Barefoot passages and sanitary areas, if not classified in group A, showers, steam baths, area of disinfecting spray facilities, pool surrounds, pool floors in non-swimmer areas if the water depth is less than 80 cm in certain areas, non-swimmer sections of wave-action pools, movable floors, paddling pools, ladders and stairs outside the pool area, accessible surfaces of diving platforms and diving boards, if not classified in group C, sauna and relaxation areas, if not classified in group A.

**Valuation group C**

Ladders and stairs leading into the water, stairs up to diving facilities and water slides, surfaces of diving platforms and diving boards over the length reserved for the diver (the slip-resistant surface of the diving platforms and diving boards must cover the front edge where the hands and the toes of the divers grip), walk-through pools, Kneipp basins, water-treading basins, inclined pool edge designs, ramps in pool surround areas.

Valuation groups	Angle of inclination	Barefoot area
A	$\geq 12^\circ$	
B	$\geq 18^\circ$	
C	$\geq 24^\circ$	

## Expert know-how for competition pools

Special know-how is required at the planning of sports pools satisfying competition standards. The in-house planning department of AGROB BUCHTAL bundles the experience from the construction of hundreds of sports pools world-wide and offers its knowledge as competent adviser at the realization of such building projects.

However, it's not just about the precise knowledge of and compliance with the rules, which are the prerequisite for recognition by the international swimming association FINA. The special products which also characterize the quality of a sports pool are a frequently discussed topic. This concerns the marking of the lanes on the pool floor, but also the end walls, which support the swimmers' turns and push-offs thanks to slip-resistant surfaces. The experts from AGROB BUCHTAL will be pleased to explain the advantages of appropriate product solutions. They support their dialogue partners with a wide spectrum of water sports experience: with swimming, water polo and diving, but also with "exotics" such as underwater hockey.

## Safety for people with handicap

Exercise in water is relaxing and healthy. This also applies to people with disabilities. Therefore, disabled-friendly planning and equipment also play an important part in swimming pool construction. AGROB BUCHTAL supports architects in this task with technically sophisticated and visually appealing solutions which enable wheelchair users and people with visual impairment to enjoy an untroubled visit to the pool.

### A high pool edge is helpful

The "Koordinierungskreis Bäder" (coordinating organization for pool construction), to which "Deutsche Gesellschaft für das Badewesen", the German Swimming Association and the German Olympic Sports Association belong, has also addressed this issue and formulated corresponding requirements in its "Directives for Swimming Pool Construction". For example, a raised pool edge is recommended for wheelchair users, as offered by the corresponding pool edge systems from AGROB BUCHTAL. This has the advantage that bathers can move from the wheelchair to the pool edge independently and slide into the water from there. People with disabilities who are unable to move from the wheelchair into the water on their own are assisted by so-called swimming pool lifters, which are mounted at the pool edge. To avoid endangering other visitors, it should be possible to "park" the wheelchair outside the pool surround.

### Orientation for people with visual impairment

Besides people with limited mobility, blind and visually impaired people also need specific support when visiting the swimming pool. It goes without saying that no equipment should be placed in corridors or on walkways. In addition, special products from AGROB BUCHTAL, such as e.g. tactile and visually easily perceptible grooved tiles arranged as guide strips for blind people, can help these bathers to find their way. If the water level is at pool surround height, a small bulge outside the overflow channel makes it easier to feel the pool edge with the "white stick". As an alternative or additional feature, the "Koordinierungskreis Bäder" recommends gently inclined stairs which people with disabilities can use to slowly enter the pool.

### Barrier-free, slip-resistant and beautiful

Finally, barrier-free showers are essential for a disabled-friendly swimming pool. Ceramic shower tub systems and appropriate drainage channels are an integral part of the AGROB BUCHTAL range. They allow a consistent design and also correspond to the adjoining floor covering with regard to slip resistance.

## Cleaning tiles properly

Easy cleaning and lasting beauty are among the key advantages of ceramic floor and wall coverings. Even slip-resistant tiles with their rougher surface and tiles with Hytect technology retain their look and functionality for a very long time if they are cleaned properly.

Slip-resistant tiles of the classes A, B and C can be cleaned without hesitation by means of cleaning machines with rotating, soft nylon brushes or microfibre fleece as well as with high-pressure or steam cleaners.

**The use of pads or brushes with abrasive grain addition is not permitted because they can significantly reduce the slip resistance!**

As a general rule, only cleaning agents should be used which are included in the List of Tested Cleaning Agents for ceramic coverings in swimming pools published by "Deutsche Gesellschaft für das Badewesen". The instructions for use and hazard warnings of the respective manufacturer must always be observed.

Cleaning agents containing hydrofluoric acid or fluorides are absolutely unsuitable because they attack the ceramics even if diluted with plenty of water.

At the **first cleaning after completion of the construction works** and removal of the coarse dirt, cement films usually have to be removed. Only acid cleaners (cement film removers) are suitable for this, but they attack cement-based joints. Such joints must therefore be pre-wetted and thoroughly rinsed after cleaning.

At the **basic cleaning, a particularly careful interim cleaning**, stains often also have to be removed. Here are the most common stains and the respective suitable agents:

- Calcareous deposits, urine stone, rust stains, metal abrasion residues: acid cleaners
- Tar, bitumen, paint drops, residues from expansion joints: naphtha, acetone or caustic pastes
- Epoxy resins: caustic pastes or special cleaning agents
- Oil, grease, wax: highly alkaline cleaners; if required, solvents in addition
- Rubber abrasion residues, pencil lines: mechanical removal by rubbing or brushing, possibly with scouring powder

In most cases, increased exposure times and mechanical support by brushing can improve the cleaning result.

Alkaline cleaning agents are recommended for the **regular maintenance cleaning**, as they are best at dissolving everyday dirt. Depending on the water hardness, it is necessary to alternate cleaning with acid cleaning agents. In general, the following procedure has proved itself:

- Spread the cleaner in the appropriate dilution (depending on the degree of soiling) on the covering
- Let the cleaner act upon the dirt for about 15 minutes, support the chemical dissolving of the dirt mechanically with nylon brushes (without abrasive grain addition)
- Then collect or rinse away the dissolved dirt solution with sufficient water
- Thoroughly rinse the covering

Cleaners containing care products are not necessary. On the contrary: in the long term, sticky layers of grease, wax and plastic can build up, which have a negative effect on the look, hygiene and slip resistance, and also make cleaning more difficult. Disinfectants must be thoroughly removed after the exposure time. Otherwise, together with moisture, they can form a lubricating layer which impairs slip resistance.

The Hytect technology, which has an antibacterial effect and eliminates unpleasant odours in addition, significantly reduces the cleaning effort. It is not affected by either strongly acid or strongly alkaline cleaning agents. However, cleaners containing care products are not recommended also in this context, as the care product film not only reduces the slip resistance, but also impairs the functionality of the coating. If an already existing care product film is thoroughly removed, Hytect will also regain its full effectiveness.

AGROB BUCHTAL offers tiles with overglazed edges in many series. In the case of glazed **earthenware tiles**, they are included in the bundles at a certain quantity as overglazed edges are almost always required for applications of these materials. In the case of **split tiles**, overglazed or overglazed *rounded* edges are available upon request according to the following model number system:

Last figure 0 of model no. to be replaced by ...	...1 = Short edge	...2 = Longitudinal edge	...3 = Corner left	...4 = Corner right	overglazed edges
	...5 = Short edge	...6 = Longitudinal edge	...7 = Corner left	...8 = Corner right	overglazed rounded edges (bullnoses)

Example: Standard model no. 18120 = 244 x 119 x 6 mm,  
model no. 18123 = overglazed corner left

The use of color as an architectural design means has gained increasing importance during the last years. Therefore, we provide you with a list of the relevant Agrob Buchtal design series in order to facilitate planning. It classifies the colors according to:

### NCS = Natural Color System

(More detailed information can be obtained from: Scandinavian Color Institute AB, P.O.Box 49022 · S-10028 Stockholm · Phone +46/8/6174700 · Fax +46/8/6174747, Institut für Farbe – Brigitte Hartmann · Rotes Knie 6 · 74389 Cleebrohn Phone 07135/12742 · Fax 07135/12737)

### RAL Color Chart

(More detailed information can be obtained from: RAL - Deutsches Institut für Gütesicherung und Kennzeichnung e.V. · Siegburger Straße 39 · D-53757 St. Augustin Phone +49 (0) 2241/1605-0 · Fax +49 (0) 2241/1605-11)

### Lightness Value:

This figure (standard color value Y) describes the lightness of a color in comparison with an ideally white surface if illuminated under identical light conditions, i. e. same intensity, direction and quality. For an ideal white, which means that all the incident light is reflected, the value Y = 100 applies (black: Y = 0).

Please note that these classifications may only serve as an orientation aid. Original samples will be made available to you upon request.

The difference in lightness of two adjoining colored surfaces is called luminance contrast. By means of this value, one can determine whether a room design is rich in contrast, as it is required, for example, by DIN 32975 "Designing visual information in the public area for accessible use". In the following, you will find the relevant values for selected

series. They result from the respective lightness values, which are indicated as averaged values of individual measurements. We will be pleased to determine values for other products upon request.

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

**Deutsche Steinzeug tiles present better values than required by the standards.**

In addition, they are construction biologically, ecologically, hygienically and bacteriologically safe; this is guaranteed through the choice of raw materials, method of processing and firing technique.

## Terms and Classification according to DIN EN 14411

All our tiles consist of natural raw materials such as clay, quartz sand and feldspars, which are processed, refined and fired. Depending on the application they are manufactured with a glazed (GL) or unglazed (UGL) surface. They can be classified in accordance with DIN EN 14411 as follows:

### Classification of the ceramic tiles according to their groups of water absorption (E) and their shaping

Shaping	Group I E ≤ 3%	Group II <sub>a</sub> 3% < E ≤ 6%	Group II <sub>b</sub> 6% < E ≤ 10%	Group III E > 10%
<b>A</b> extruded tiles	Group AI <sub>a</sub> E ≤ 0.5% (Annex M)	Group All <sub>a-1</sub> <sup>a)</sup> (Annex B)	Group All <sub>b-1</sub> <sup>a)</sup> (Annex D)	Group All (Annex F)
	Group AI <sub>b</sub> 0.5% < E ≤ 3% (Annex A)	Group All <sub>a-2</sub> <sup>a)</sup> (Annex C)	Group All <sub>b-2</sub> <sup>a)</sup> (Annex E)	
<b>B</b> dry-pressed tiles	Group BI <sub>a</sub> E ≤ 0.5% (Annex G)	Group BII <sub>a</sub> (Annex J)	Group BII <sub>b</sub> (Annex K)	Group BIII <sub>b</sub> (Annex L)
	Group BI <sub>b</sub> 0.5% < E ≤ 3% (Annex H)			
a) The groups All <sub>a</sub> and All <sub>b</sub> are subdivided into two parts (parts 1 and 2) with different product requirements. b) Group BIII essentially applies to glazed tiles. There is a small number of dry-pressed unglazed tiles manufactured with a water absorption of more than 10% to which this product group does not apply.				

Traditionally the following terms are used:

#### Extruded tiles

(marked with A)

Tiles that are cut off with a certain length from a bar formed from the plastic mass by means of an extruder.

#### Dry-pressed tiles

(marked with B)

Tiles that are formed from a finely ground and subsequently granulated mass by pressing under high pressure.

**Split tiles** are frost-resistant, extruded double-tiles which are fired at a temperature of up to max. 1280 °C in upright position.

**Stoneware tiles** are frost-resistant, single extruded vitrified tiles with a firing temperature of appr. 1260 °C.

**KerAion** is the unique extruded ceramic large-size panel from AGROB BUCHTAL.

**Vitrified dry-pressed tiles** are frost-resistant, single dry-pressed tiles with a firing temperature of up to 1200 °C.

**Porcelain stoneware** stands for especially densely sintered tiles with a water absorption of < 0.5 %.

**Mosaics** are small (porcelain) stoneware tiles stuck onto sheets.

**Earthenware tiles** are non-frost-resistant, single dry-pressed tiles with a firing temperature of up to appr. 1100 °C.

**The water absorption E** in weight-% is determined in accordance with DIN EN ISO 10545-3.

#### Description of dimensions

Coordinating dimension (C) in cm = Work size (W) + joint (J)  
 Work size (W) in mm = Dimensions of the visible surfaces and thickness (d)

## Dimensions and Surfaces

### 1-5. Dimensions, DIN EN ISO 10545-2

All dimensions are determined in accordance with the standard.

Permissible length and width tolerances corresponding to the product standards						
DIN EN 14411	Group AI <sub>a</sub> / AI <sub>b</sub> (25x12.5 cm)		Group All <sub>a</sub> (25x12.5 cm)		Group BI <sub>a</sub> / BI <sub>b</sub> (30x30 cm)	Group BIII (10x10 cm)
	„Nature“	„Precision“	„Nature“	„Precision“		
Deviation from the work size	± 2%, max. 4 mm	± 1%, max. 2 mm	± 2%, max. 4 mm	± 1.25%, max. 2 mm	± 0.6%, max. 2 mm	± 0.2%, max. 2 mm
Deviation from the average side length	± 1.5%	± 1.0%	± 1.5%	± 1.0%	± 0.5%	± 0.5%

The work sizes of our **special pieces** are given according to visual sides.

### 6. Surface Quality, DIN EN ISO 10545-2

The surfaces of 1 m<sup>2</sup> or 30 pieces are tested at 300 lux for visible defects at a distance of 1 m.

### 7. Color Deviations, DIN EN ISO 10545-16

Glazed mono-colored products with values of Δ E<sub>cmc</sub> < 0.75 are considered as identical in color; the value of 1.0 applies to unglazed mono-colored products.

#### 7.1. Color Shade Grading

The color shade code is stamped on the box. Only identical color shades will result in a uniform surface look. In the case of rustic split tiles greater color deviations are normal. During laying, tiles from different boxes should be mixed.

### 8. Size Grading

The production sizes vary for technical reasons. The production size is coded and stamped on the box. Only boxes with the same coding should be laid together. According to VOB, the differences are evened out in the joints.

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

# Physical Properties

## 1. Water Absorption, DIN EN ISO 10545-3

The **water absorption (E)** gives the weight increase as compared to the dry weight of samples saturated with water under vacuum.

### 1.1 Apparent Density, DIN EN ISO 10545-3

It gives the ratio between mass and external volume.

## 2. Modulus of Rupture, DIN EN ISO 10545-4

The breaking strength **F** is determined on samples by means of the tree-point load in **N**. From this, the modulus of rupture and the breaking load are calculated according to the following formula.

### Modulus of Rupture

$$R = \frac{3 \cdot F \cdot L}{2 \cdot b \cdot h^2}$$

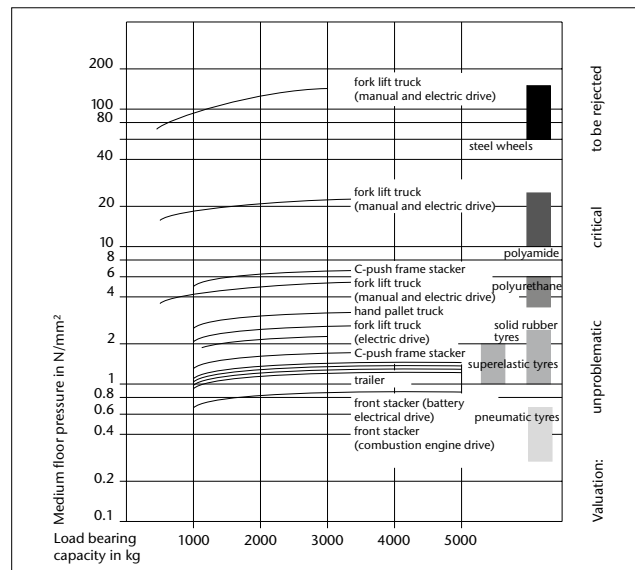

**F** = breaking strength in N  
**L** = bearing span in mm  
**b** = width in mm  
**h** = thickness in mm  
**R** = modulus of rupture

### Breaking Load

$$S = \frac{F \cdot L}{b}$$

Possible Applications	Stress Group
Breaking strength under 1,500 N Housing construction and floor coverings subject to comparable mechanical stress, e.g. hotel bathrooms, rooms in the health service sector	1
Breaking strength 1,500 – 3,000 N Administration, trade and industry (practicable with vehicles with pneumatic tyres), e.g. canteen kitchens, canteens, traffic zones, car exhibition and maintenance areas, sales rooms, always without industrial truck traffic Floor pressures up to 2 N/mm <sup>2</sup>	2
Breaking strength 3,000 – 5,000 N Trade and industry (industrial truck traffic with superelastic, solid rubber and vulkollan tyres), e.g. in food retailing and wholesaling, non-food retailing and wholesaling, shopping malls Floor pressures 2 to 6 N/mm <sup>2</sup>	3
Breaking strength 5,000 – 8,000 N Trade and industry; areas of application as in group 3, but practicable with polyamide rollers Floor pressures 6 to 20 N/mm <sup>2</sup>	4
Breaking strength above 8,000 N Trade and industry; heavy-duty areas with industrial truck traffic with polyamide rollers; runners of metal parts, such as e.g. in factory buildings, assembly halls and storerooms, repair workshops for machines and heavy equipment Floor pressures > 20 N/mm <sup>2</sup>	5

### Floor pressures in N/mm<sup>2</sup> of industrial truck wheels according to a FMPA test in Stuttgart

The table illustrates the floor loads and indicates the effect of the different wheel types: steel wheels should be rejected and polyamide (Nylon and Perlon) is not advisable. Softer tyres (≤ 75 Shore-A-Hardness) as well as larger wheel diameters and wider supporting surfaces are especially advantageous.

### Important note:

The “application possibilities” are of course only recommendations, as the method and quality of laying are decisive factors. Our recommendations are based on conventional, professional laying. With increasing mechanical load as well as harder tyres a thicker tile is required.

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

**Mechanical Strength**

Deutsche Steinzeug offers tiles in thicknesses from 5 up to 20 mm for extreme loads in industrial and commercial areas. The breaking load values of our products partly are by far better than the values required by DIN EN 14411 (the relevant test certificates will be made available on request).

The calculated breaking load indicates the suitability for floors subject to mechanical loads. The stress itself is caused by bending rather than by pressure. The “extra strong” tiles from our programme with their high pressure, breaking and bending strength values are the ideal covering for floors subject to heavy loads. They withstand the wheels of industrial trucks, fork lift trucks and platform lift-trucks with their high floor pressure. They are especially suitable as floor coverings for industrial logistics, hyper- and supermarkets.

**3. Compressive Strength**

The compressive strength of tiles is not standardized. In the case of vitrified dry-pressed tiles it reaches values of up to 150 N/mm<sup>2</sup>. The following conversion table shows the importance of a perfect and professional embedding of the tiles on site. The relatively low values for cement and thin-bed mortar can only be compensated by special and professional laying (mortar composition, water/cement value and manual or mechanical compression).

**4. Resistance to Shock, DIN EN ISO 10545-5**

Rebound measurement with 5 samples.

**5. Resistance to Deep Abrasion, DIN EN ISO 10545-6**

With regard to the deep abrasion on unglazed tiles, the abrasion is determined by means of fusion corundum and a rubbing plate. The lower the value, the higher the wear resistance of the material.

**6. Glaze Abrasion, DIN EN ISO 10545-7**

The abrasion class of glazed tiles is established in the wet test. Artificial abrasion is produced with the help of aluminium oxide grains, steel balls and the addition of water in an eccentrically revolving system. The number of revolutions at which a visible change of the test surface occurs results in the following classification:

Resistance to Surface Abrasion	
Class	Revolutions
0	100
1	150
2	600
3	750/1500
4	2100/6000/12000
5	>12000*

\* Must pass the stain test according to DIN EN ISO 10545-14.

**Vitrified material has a compressive strength approx. 10 - 20 times higher than cement mortar, cast plaster floors and reinforced concrete.**

**Conversion table for different materials**

Types of material	N/mm <sup>2</sup>	N/cm <sup>2</sup>	kN/cm <sup>2</sup>
Vitrified dry-pressed tiles	100 – 150	10,000 – 15,000	10 – 15
Extruded split tiles	180 – 250	18,000 – 25,000	18 – 25
Cement mortar Gr. III	10	1,000	1

C 30/37 (B 35)	35	3,500	3.5

#### Class 0

The use of glazed tiles of this class for floor coverings is not recommended.

#### Class 1

Floor coverings in areas mainly walked on in soft footwear or barefoot and not exposed to abrasive dirt (e.g. bathrooms and bedrooms without direct access from outside).

#### Class 2

Floor coverings in areas occasionally walked on with soft or normal footwear and exposed to only little abrasive dirt (e.g. rooms in living areas of houses, except kitchens, entrances and similar heavily frequented rooms). This does not apply to special footwear such as e.g. hobnailed boots.

#### Class 3

Floor coverings in areas frequently walked on with normal shoes and exposed to little abrasive dirt (e.g. kitchen-cum-living-rooms, halls, corridors, balconies, loggias and terraces). This does not apply to special footwear such as e.g. hobnailed boots.

#### Class 4

Floor coverings walked on regularly and exposed to little abrasive dirt, so that they are subject to greater stress as in the case of class 3 (e.g. commercial kitchens, hotels, exhibition and sales rooms).

#### Class 5

Floor coverings subject to heavy pedestrian traffic over long periods of time and exposed to little abrasive dirt, so that they are subject to the most extreme stress under which glazed tiles can be applicable (e.g. public areas such as shopping centres, entrance halls of airports, hotel foyers, public footpaths and industrial applications).

Every floor covering is subject to wear. This depends on the area of application and the frequency of use, the kind and degree of dirt as well as the hardness and resistance to wear of the covering material. While unglazed vitrified floor tiles can be used practically anywhere, glazed floor tiles have to be categorized according to stress groups. Scrapers, mats and the like help to remove dirt and abrasives and to protect glazed floor coverings. Something of this kind has to be provided especially in rooms with direct access from outside or from the garden.

#### Extreme Stress

For such areas we recommend the use of integrally colored, unglazed tiles, which are available in a wide range of colors and sizes. Examples: floors subject to high traffic loads, e.g. in supermarkets, hotels, schools, administrative buildings, railway stations, hospitals, passageways, etc., taking into account the mechanical load.

#### 7. Coefficient of Expansion, DIN EN ISO 10545-8

The coefficient of expansion is ascertained between room temperature and 100°C ermittelt. The measured values are at around  $6.0 \times 10^{-6}$  m/(mK) in the case of vitrified materials and at around  $8.0 \times 10^{-6}$  m/(mK) in the case of porcelain stoneware. At 8 m length and 50° temperature difference the result is a change in length of approx. 2.4 mm in the case of vitrified materials (in the case of screed/concrete 4.6 mm and steel 5.6 mm).

#### 8. Thermal Shock Resistance, DIN EN ISO 10545-9

The thermal shock resistance is tested between 15° and 145°C.

#### 9. Moisture Expansion, DIN EN ISO 10545-10

The moisture expansion is determined between tempered and water-saturated samples.

#### 10. Resistance to Glaze Cracking, DIN EN ISO 10545-11

This test takes place in the autoclave at 500 KPa with subsequent color control.

Glazes with hair cracks/crazes are marked as such and require the wetting of the covering prior to pointing to avoid deposits of fine particles of the pointing mortar in the hair cracks. Colored pointing compounds are not suitable in the case of these glazes. The glaze surfaces must not be marked with felt-tip pen and the like.

#### 11. Thermal Conductivity etc.

Thermal conductivity, heat radiation and storage capacity as well as the thermal resistance are not standardized. Vitrified material produces the following approximate values:

Thermal conductivity:	1 W/mK	Heat storage capacity:	0.8 kJ/kgK
Heat radiation:	5.3 W/m <sup>2</sup> K <sup>4</sup>	Thermal resistance:	0.01 m <sup>2</sup> K/W

#### 12. Electrical Leakage Resistance

With a volume resistance of  $>10^{10}$  Ohm (DIN EN 1081), our ceramics is insulating in dry condition. With the series Eladuct and KerAion ELA 10.6, however, we offer ceramics for floors capable of discharging static electricity. The glaze of ELA 10.6 has a surface resistance of approx.  $10^6$  Ohm according to DIN EN 1081. The discharge of static electricity is effected from the glaze via conductive joints and tile adhesive into copper strips to be connected to earth, which are laid on the base to be tiled. In the case of Eladuct, the complete tile body is capable of discharging static electricity. The volume resistance according to DIN EN 1081 is approx.  $10^8$  Ohm. Here, conductive joints are not required; apart from that, the base has to be carried out as described for ELA 10.6.

#### 13. Steam Diffusion Resistance

According to DIN EN ISO 12572 the steam diffusion resistance is approx.  $\mu$  120,000 in the case of vitrified material/split tiles and  $\mu$  100,000 in the case of earthenware (excluding joints).

#### 14. Resistance to Frost, DIN EN ISO 10545-12

The test for frost resistance is carried out on 10 samples or  $>0.25$  m<sup>2</sup> samples. After water saturation under vacuum the samples are checked for defects after 100 frost-thaw alternations.

The resistance to frost of an outdoor flooring, however, does not only depend on the quality of the ceramic tiles used. **Professional construction and laying are essential.** For this, please refer to our specifications and the notice of the umbrella organization of the German building and construction industry "Outdoor Tiled and Paved Coverings".

#### 15. Light and Color Fastness

Both glazed and unglazed ceramics are light- and color-fast according to DIN 51094.

#### 16. Luminance

The lightness value of a tile describes the brightness of the surface as perceived by the human eye. The measuring value  $Y = 100$  corresponds to the brightness of an absolutely white surface, and  $Y = 0$  to that of an absolutely black surface.

The lightness value is determined for mono-colored tiles.

#### 17. Behaviour in Fire

Ceramic tiles are classified A 1 according to EN ISO 13501-1 and DIN EN 14411. Therefore, they are generally non-combustible and thus fire-resistant. Also in the case of fire they do not release any toxic emissions.

## Chemical Properties

---

### 1. Resistance to Chemicals, DIN EN ISO 10545-13

#### Resistance to Household Chemicals and Bath Water Additives

- Household chemicals
  - Ammonium chloride solution 100 g/l
- Bath salts
  - Sodium hypochlorite solution 20 mg/l

#### Classes

A/B/C\*

#### Resistance to Acids and Alkalis

- Low concentration (L)
  - a) Hydrochloric acid solution 3% (V/V)
  - b) Citric acid solution 100 g/l
  - c) Potassium hydroxide solution 30 g/l
- High concentration (H)
  - a) Hydrochloric acid solution 18% (V/V)
  - b) Lactic acid solution 5% (V/V)
  - c) Potassium hydroxide solution 100 g/l

#### Classes

LA/LB/LC or HA/HB/HC\*

#### Acid Protection and Apparatus Engineering

The resistance for acid protection engineering DIN EN 993-16 or chemical apparatus engineering DIN 28062 is subject to individual tests.

\* Class A shows the highest resistance to chemicals, which decreases more and more towards C.

### 2. Stain Resistance, DIN EN ISO 10545-14

#### Stain Forming Substances

- Stain forming substances, leaving traces
  - Green stain forming substances in oil
  - Red stain forming substances in oil
- Chemical stain forming substances
  - Iodine, 13 g/l in alcohol
- Stain forming substances, forming a film
  - Olive oil

#### Cleaning (within the framework of the test)

- Cleaning agent
  - Hot water (+55 °C)
  - Weak cleaning agent
  - Strong cleaning agent
- Solvent
  - Hydrochloric acid solution 3% (V/V)
  - Potassium hydroxide 200 g/l
  - Acetone

#### Classes

Cl. 5 / Cl. 4 / Cl. 3 / Cl. 2 / Cl. 1\*

### 3. Lead and Cadmium Delivery

The glazed surfaces are exposed to a 4 percent acetic acid solution. Then, the quantity of the delivered lead and cadmium is determined.

\* Class 5 shows the highest stain resistance, which decreases more and more towards 1.

## Surface Coatings and Upgradings

### Hytect

Hytect is a highly effective and durable coating of tiles and panels of Deutsche Steinzeug.

The coating baked onto the surface on the base of titanium dioxide uses the principle of the photocatalysis.

It offers the user the following advantages:

#### A) Hytect decomposes bacteria and germs

The surface is activated by sunlight or artificial lighting. Activated oxygen forms, which decomposes microorganisms.

#### B) Hytect eliminates disagreeable odours

Disagreeable or even unhealthy odours in the air are also eliminated by Hytect.

#### C) Hytect reduces the cleaning efforts

The hydrophilic surface makes it possible for water to get under the dirt. In this way the quantity of cleaning agents is considerably reduced, which means a contribution to environmental protection and the saving of time for manual works at the same time.

Hytect surfaces are odourless, non-poisonous, meet the requirements for food and are completely harmless for persons suffering from allergies.

Laying and pointing are carried out by the usual techniques. The conventional agents (without hydrofluoric acid and its compounds) are applicable for cleaning. All additives forming a film, leaving fat on the surface or impregnating are excluded, which impair the surface activation by light.

Renowned institutes in Germany and abroad have confirmed us the corresponding effects of Hytect.

### Protecta Surface Upgrading

#### Better Beats Good ...

Unglazed vitrified tiles are hard-wearing and resistant by nature. Thanks to the Protecta surface upgrading, the stain and dirt resistance could be improved considerably: during the firing process, the coating applied in-plant is ceramically bonded to the biscuit and closes the existing "micropores" quite natural for unglazed ceramics. In this way, the penetration of substances forming stains is prevented. Thus, an impregnation is no longer required and may possibly even have a negative effect in the case of slip-resistant tiles with Protecta surface upgrading, as the impregnating agent can not penetrate the tile but remains on the surface as lubricating film.

Products with Protecta surface upgrading are marked with this symbol in the corresponding series:

### Hygiene

Glazed tiles and tiles with Protecta surface upgrading of Deutsche Steinzeug ensure the best possible hygiene conditions. Thanks to the closed surface, they offer no possibility for germs to proliferate. Tests of institutes for hygiene confirm the suitability for the covering of drinking water reservoirs. Hyper-sensitive people such as those suffering from allergies make the best experiences with tiles.

### Cleaning

On principle, claddings and coverings must be protected by appropriate measures against heavy soiling which may be caused in particular by subsequent construction works (painting etc.).

Our tiles can generally be cleaned with water and a neutral or alkaline cleaning agent.

In the case of hard water, the sporadic use of acid cleaning agents is required. In the case of stains, cleaning depends on the type of stains and has to be carried out with suitable chemicals.

In the case of a higher concentration of the cleaning agent used, subsequent wiping with clear water is required. Rinsing with clear water is absolutely necessary when carrying out a basic cleaning. Cleaning agents containing maintenance additives are not recommended by us. They usually reduce the slip resistance and cause a negative visual appearance of the floor covering by forming layers! Important: the use of cleaning machines with pads containing abrasive grain has a polishing effect by which the slip resistance of the tiles is considerably reduced. We therefore expressly disapprove of such methods. Hydrofluoric acid or its compounds attack the ceramics and cause irreversible damage!

You will find detailed cleaning instructions for ceramic tiles on the Internet at [www.agrob-buchtal.de](http://www.agrob-buchtal.de)

- ➔ Cleaning instruction.

### Impregnation

Unglazed stoneware without Protecta surface upgrading or Hytect coating should be impregnated in order to prevent the penetration of colored liquids, fats and oils and to facilitate cleaning.

The impregnating agent must be applied on the clean and dry floor; excess material must be removed immediately.

# Slip Resistance

## 1. Coefficient of Friction/Slip Resistance

Workshop rules as well as accident prevention regulations require floors to be smooth, slip-resistant and easy to clean. Special protective measures against slipping are necessary where there is a risk as a result of the use of water, oil, slush, grease or waste. This should be taken into consideration when choosing the surface material. This clear requirement is based on investigations carried out by the insurance companies, which proved that slipping is the primary cause of accidents.

### 1.1. Industrial Areas

Competent authority:

Deutsche Gesetzliche Unfallversicherung,  
Mittelstraße 51, 10117 Berlin-Mitte, phone: +49 (0)30 28876-3800,  
fax: - 3808, www.dguv.de, info@dguv.de

Test standards: DIN EN 16165 and DIN 51133

Guideline: ASR A 1.5 - Floors

Code of practice: DGUV regulation 108-003 "Floors in work rooms and work areas with high risk of slipping" (previous BGR 181)

Test procedure: Inclined plane, safety footwear worn, test medium oil. The surface finish can be smooth, fine-rough, rough or profiled.

The displacement space (V4-V10) is the open space between the upper walked-on surface and the drainage level of profiled surfaces.

## Valuation Groups

In a detailed table (see next page) the required valuation groups are assigned to work areas where there is a high risk of slipping. Information is available from Deutsche Gesetzliche Unfallversicherung and AGROB BUCHTAL.

### Test on "inclined plane"

Valuation groups	Angle of inclination	Industrial + commercial areas
R9	> 6° - 10° low static friction	
R10	> 10° - 19° normal static friction	
R11	> 19° - 27° increased static friction	
R12	> 27° - 35° high static friction	
R13	> 35° very high static friction	

The indicated angles of inclination exclusively serve for the assignment of the valuation groups and can not be equated with the angles of inclination of slopes/ramps.

Slip-resistant tiles are marked with the logo "GRIP" in the corresponding series:

**Legal Basis**

Workshop rules as well as accident prevention regulations require floors to be smooth, slip-resistant and easy to clean. The brochure "Technische Regel für Arbeitsstätten" ASR. A 1.5 – Floors (Code of practice for work areas) contains detailed requirements.

<b>18 Glass and stone processing</b>			
18.1 Stone cutting, stone grinding	R11	32.4 Pool surrounds	R10
18.2 Glass shaping of hollow glass ware, container ware	R11	<i>NOT recommended by AGROB BUCHTAL! Be sure to use R11 (in combination with valuation group B)!</i>	
18.3 Grinding areas for hollow glass ware, flat glass	R11		
18.4 Insulating glass manufacture; handling of drying agents	R11 V6		
18.5 Packaging, shipping of flat glass; handling of anti-adhesive agents	R11 V6		
18.6 Etching and acid polishing facilities for glass	R11	*) For floors in wet areas walked on barefoot, see DGUV information "Floor coverings in wet barefoot areas" (DGUV information 207-006).	
<b>19 Cast concrete factories</b>			
19.1 Concrete washing areas	R11	**) Entrance areas according to number 0.1 are all areas with direct access from outside and in which moisture from outside can be brought (also see section 6 para. 3, utilization of products absorbing dirt and moisture). For adjoining areas or other rooms with large surfaces, section 4 para. 10 has to be observed.	
<b>20 Storage areas</b>			
20.1 Storage areas for oils and fats	R12 V6		
20.2 Storage areas for packed food	R10		
20.3 Outdoor storage areas	R11 (or R10 V4)	***) Stairs and ramps according to numbers 0.3 and 0.5 are those possibly exposed to moisture brought in from outside. For adjoining areas, section 4 para. 10 has to be observed.	
<b>21 Chemical and thermal treatment of iron and metal</b>			
21.1 Pickling plants	R12		
21.2 Hardening shops	R12	****) If the same floor covering was laid in all areas, the displacement space can be lowered down to V4 after a risk assessment (taking into consideration the cleaning method, the working processes and the quantity of slippery substances on the floor).	
21.3 Laboratory rooms	R11		
<b>22 Metal processing, metal workshops</b>			
22.1 Galvanizing shops	R12		
22.2 Grey cast iron processing	R11 V4	*****) The pedestrian areas which are not subject to a risk of slipping because of weather influences such as driving rain or moisture brought in.	
22.3 Mechanical processing areas (turnery, milling shop), punching room, pressroom, drawing shop (pipes, wires) and areas exposed to increased stress by oil and lubricants	R11 V4	Floors in rooms must not present any irregularities, cavities or dangerous slopes; stumbling must be impossible on these floors. They must be secured against shifting or tilting (e.g. in the case of covers), load-bearing and slip-resistant.	
22.4 Parts cleaning areas, exhaust steam areas	R11 V4		
22.5 Partial cleaning areas, Damping areas	R12		
<b>23 Vehicle repair workshops</b>			
23.1 Repair and servicing bays	R11	Floors are to be designed without inclination. Exception: functional inclinations outside of permanently installed workplaces, e.g. for the drainage of liquids or for bridging differences in height, e.g. with walkable sloping ramps.	
23.2 Working and inspection pits	R12 V4		
23.3 Car washing halls, washing areas	R11 V4		
<b>24 Aircraft repair workshops</b>			
24.1 Aircraft hangars	R11	In areas which must be continuously frequented in the scope of their normal utilization, the slip resistances of the different floor surfaces must not differ from each other to such an extent that there may be a risk of stumbling and slipping. This may be the case if adjoining floor surfaces differ with regard to slip resistance: 1. by more than one R-group in the case of two adjoining areas. 2. by more than two R-groups if the transition to a different slip resistance is clearly visible or is to be expected (e.g. in the case of door passages). If there is a risk of stumbling or slipping due to different slip resistances, appropriate measures have to be taken, such as transition zones which are at least 1.5 m long in the direction of walking. Note: It is recommended to design the slip resistance of a floor within a working area as uniformly as possible, e.g. by making sure that other surface qualities within the floor covering, such as covers, markings or films glued on the floor, do not differ from each other by more than one R-group.	
24.2 Repair hangars	R12		
24.3 Washing halls	R11 V4		
<b>25 Sewage treatment plants</b>			
25.1 Pump rooms	R12		
25.2 Rooms for sludge draining facilities	R12		
25.3 Rooms for screening equipment	R12		
25.4 Stands of workplaces, scaffolds and maintenance platforms	R12		
<b>26 Fire brigade buildings</b>			
26.1 Vehicle parking places	R12		
26.2 Rooms for hose maintenance equipment	R12		
<b>27 Functional rooms in the respiratory protection training facility</b>			
27.1 Preparation room	R10	Entrances of buildings have to be designed in such a way that dirt and moisture brought in do not cause a risk of slipping. A sufficiently large roofing above entrances of buildings is an appropriate measure for this. Inside the building, this can be achieved by providing clean-off zones in the form of mats absorbing the dirt and the moisture, which are specially designed for the expected pedestrian traffic with regard to their length, width and the material used and are at least 1.5 m long in the direction of walking over the whole width of the passage. Clean-off zones must be secured against shifting and must not cause a risk of slipping, e.g. by being flush with the directly adjoining floor covering. Depending on the degree of soiling, clean-off zones must be cleaned or replaced in such a way that their functionality is maintained.	
27.2 Fitness room	R10		
27.3 Training room	R11		
27.4 Sluice	R10		
27.5 Target room	R11		
27.6 Acclimatization room	R11		
27.7 Control room	R9		
<b>28 Schools and day-care facilities for children</b>			
28.1 Entrance areas, corridors, assembly halls	R9	Depending on the operational exposure to slippery substances to be expected, floors in working rooms and areas must be provided with a discharge facility, if required. The surfaces adjoining discharge openings as well as drain channels should have a slope of at least 2 per cent in order to facilitate the draining of fluid liquids. These areas should preferably be located outside of traffic routes. The discharge of liquids via traffic routes should be avoided, if possible.	
28.2 Class rooms, group rooms	R9		
28.3 Stairs	R9		
28.4 Toilets, washrooms	R10		
28.5 Instructional kitchens in schools (see no. 9.2, 9.6 or 9.7)	R10		
28.6 Kitchens in day-care facilities for children (also see no. 9)	R10		
28.7 Machine rooms for wood processing	R10		
28.8 Special rooms for handicrafts	R10		
28.9 Schoolyards	R11 (or R10 V4)		
<b>29 Financial institutions</b>			
29.1 Counter areas	R9	Floor surfaces which normally are wet and have to be walked on barefoot, e.g. in swimming pools as well as sanitary rooms such as washing and changing rooms, must be suitable for ensuring safe walking.	
<b>30 Plant traffic routes in outdoor areas</b>			
30.1 Footpaths	R11 (or R10 V4)		
30.2 Loading platforms			
30.2.1 covered	R11 (or R10 V4)		
30.2.2 uncovered	R12 (or R11 V4)		
30.3 Sloping ramps (from a slope of 3 %; e.g. for wheel-chairs, loading platforms)	R12 (or R11 V4)		
30.4 Tank-up areas			
30.4.1 covered	R11		
30.4.2 uncovered	R12		
<b>31 Parking areas</b>			
31.1 Garages, car-parks not exposed to weather influences*****)	R10		
31.2 Garages, car-parks exposed to weather influences	R11 (or R10 V4)		
31.3 Open-air parking areas	R11 (or R10 V4)		
<b>32 Swimming pools</b>			
32.1 Individual and common dressing rooms	R10

<i>NOT recommended by AGROB BUCHTAL! Be sure to use R11 (in combination with valuation group B)!</i>			

## 1.2. Barefoot areas

Competent authority:

Deutsche Gesetzliche Unfallversicherung, Mittelstraße 51, 10117 Berlin-Mitte, tel.: +49 (0)30 28876-3800, fax: - 3808, www.dguv.de, info@dguv.de, www.unfallkassen.de.

Floors in wet barefoot areas, e. g. swimming pools, hospitals as well as dressing rooms, washrooms and showers in sports and work facilities.

Test standard: DIN EN 16165.

Code of practice: DGUV information 207-006 "Floor coverings in wet barefoot areas" (previous GUV-I 8527).

Testing method: Inclined plane, walked on barefoot, wetting agent solution as test medium.

The surfaces are smooth, micro-rough or slightly profiled. "Nonslip" glazes with their micro-rough surfaces have proved to be excellent in practice.

The various areas are assigned to the valuation groups. Information can be obtained from Deutsche Gesetzliche Unfallversicherung and AGROB BUCHTAL.

### Valuation group A

- Barefoot passages and sanitary areas (nearly dry)
- Individual and common dressing rooms
- Pool floors in non-swimmer areas if the water depth is more than 80 cm in the entire area
- Sauna and relaxation areas (nearly dry)

### Valuation group B

- Barefoot passages and sanitary areas, if not classified in group A
- Showers
- Steam baths
- Area of disinfecting spray facilities
- Pool surrounds
- Pool floors in non-swimmer areas if the water depth is less than 80 cm in certain areas
- Non-swimmer sections of wave-action pools
- Movable floors
- Paddling pools
- Ladders and stairs outside the pool area, if not classified in group C
- Accessible surfaces of diving platforms and diving boards, if not classified in group C
- Sauna and relaxation areas, if not classified in group A

### Valuation group C

- Ladders and stairs leading into the water
- Stairs up to diving facilities and water slides
- Surfaces of diving platforms and diving boards over the length reserved for the diver (the slip-resistant surface of the diving platforms and diving boards must cover the front edge where the hands and the toes of the divers grip)
- Walk-through pools
- Inclined pool edge designs
- Kneipp basins, water-treading basins
- Ramps in the pool surround area with an inclination > 6 %
- Starting blocks

Walkable seating areas such as e.g. stands and pedestals near the pool into which moisture can be brought must be treated like floor coverings. If barefoot areas are regularly also walked on with footwear, the requirements according to ASR A1.5/1,2 must be observed in addition.

## Test on "inclined plane"

Valuation groups	Angle of inclination	Barefoot area
A	$\geq 12^\circ$	
B	$\geq 18^\circ$	
C	$\geq 24^\circ$	

The indicated angles of inclination exclusively serve for the assignment of the valuation groups and can not be equated with the angles of inclination of slopes/ramps.

## 1.3. Measurement of sliding friction

Competent authority:

Deutsche Gesetzliche Unfallversicherung, Mittelstraße 51, 10117 Berlin-Mitte, tel.: +49 (0)30 28876-3800, fax: - 3808, www.dguv.de, info@dguv.de, www.unfallkassen.de.

Test standard: DIN 51131

Code of practice: DGUV information 208-041 "Assessment of the risk of slipping under operating conditions" (previous GUV-I 8687).

This test is not a type examination and thus is neither suitable for the choice of floor coverings at the planning stage nor for classification in a slip-resistance valuation group. The method can be applied, e.g. for assessing the success of cleaning measures or in the event of planned changes of utilisation.

For the choice of a floor covering, DGUV information 108-003 (previous BGR 181) and DGUV information 207-006 (previous GUV-I 8527) respectively must be applied exclusively!

## 1.4. Private areas

With regard to slip resistance, ceramic floor coverings in private areas are not subject to standard regulations. Independent of that, however, we recommend that you choose slip-resistant tiles according to your personal safety requirements.

## Color Shade Variation

---

“Color shade variation” refers to the variations in color between the tiles of a certain color, i.e. the degree of shading. Our products are classified into 4 shading coefficients.

**V0** = No variation / no play of colors  
**V1** = Low variation / low play of colors  
**V2** = Medium variation / medium play of colors  
**V3** = High variation / high play of colors  
**V4** = Strong variation / strong play of colors

## Mosaics glued thermoplastically on back: Permanently safe also in wet areas

---

The thermoplastic glueing of mosaics of the brands AGROB BUCHTAL and Jasba is also perfectly suitable for permanently wet and underwater areas. Analyses of independent institutes have proved that no microbiological infestation at the glass fibre net occurs under normal hygienic conditions. With the values  $>0.5\text{N/mm}^2$ , the bonding behaviour after dry and wet storage is better than the values required according to DIN EN 12004. Thus, the thermoplastic glueing on back can be recommended not only for dry areas but also for underwater areas (swimming

pools and whirlpools) as well as for permanently wet areas such as showers and pool surrounds. In addition, the glueing on back facilitates laying and leads to considerable time saving compared to the film on the face side required so far. The glass fibre net on the back largely prevents the penetration of tile adhesive in the joints. The time-consuming removal of the film and possible residues on the tile surface is no longer necessary, and the cladding of columns and curvatures is significantly simplified.

**Quality Controls**  
 Quality controls are carried out by:  
 – manufacturers themselves with strict sorting  
 – controls and special tests by the Deutsche Steinzeug laboratories  
 – individual and batch testing by external material  
 testing institutions in Germany and abroad

## Certificates

The characteristics and the quality of our products are constantly tested by acknowledged material testing institutions. The corresponding test certificates are available.

\* We will be pleased to make a survey of the certified individual products available to you on request.

## Shower Tub System – Area Pro/Plural non-slip/Plural unglazed/Basis 3

The shower tub system consists of special tiles for realizing a shower tub integrated in the tile covering.

The shower tub system is a registered design. It meets the requirements of DIN 18040 “Barrier-free building” and DIN 18025 “Barrier-free living”.

In Germany, the 10 mm lip means that it is possible to take full advantage of various housing grants.

The 100 mm modular dimension inclusive of a 3 mm wide joint guarantees perfectly hygienic tile coverings with a narrow joint width and accurately sized tiles.

As with all slip-resistant surfaces of Plural non-slip/Plural unglazed, the series Basis 3, the surfaces of both the glazed and the ceramically upgraded unglazed tiles are very easy to clean.

The shower tub system is predestined for wet areas in hospitals, sanatoriums, rehabilitation centres, old people’s and nursing homes, but also for showers in commercial areas, swimming pool, sauna and sports facilities, hotel and private bathrooms.

1. The shower tub is a module with the necessary slope that can be integrated in the joint grid of the tile covering as required.

2. In combination with the cove skirting laid horizontally, a rounded transition between floor and wall covering is possible.

**Area Pro, Plural non-slip, Plural unglazed**

**Basis 3 Softcorn**

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

## The Shower Tub System of the Series Chroma / Chroma unglazed – Quantum

This shower tub system consists of only two components: the strip and the one-piece corner belonging to it.

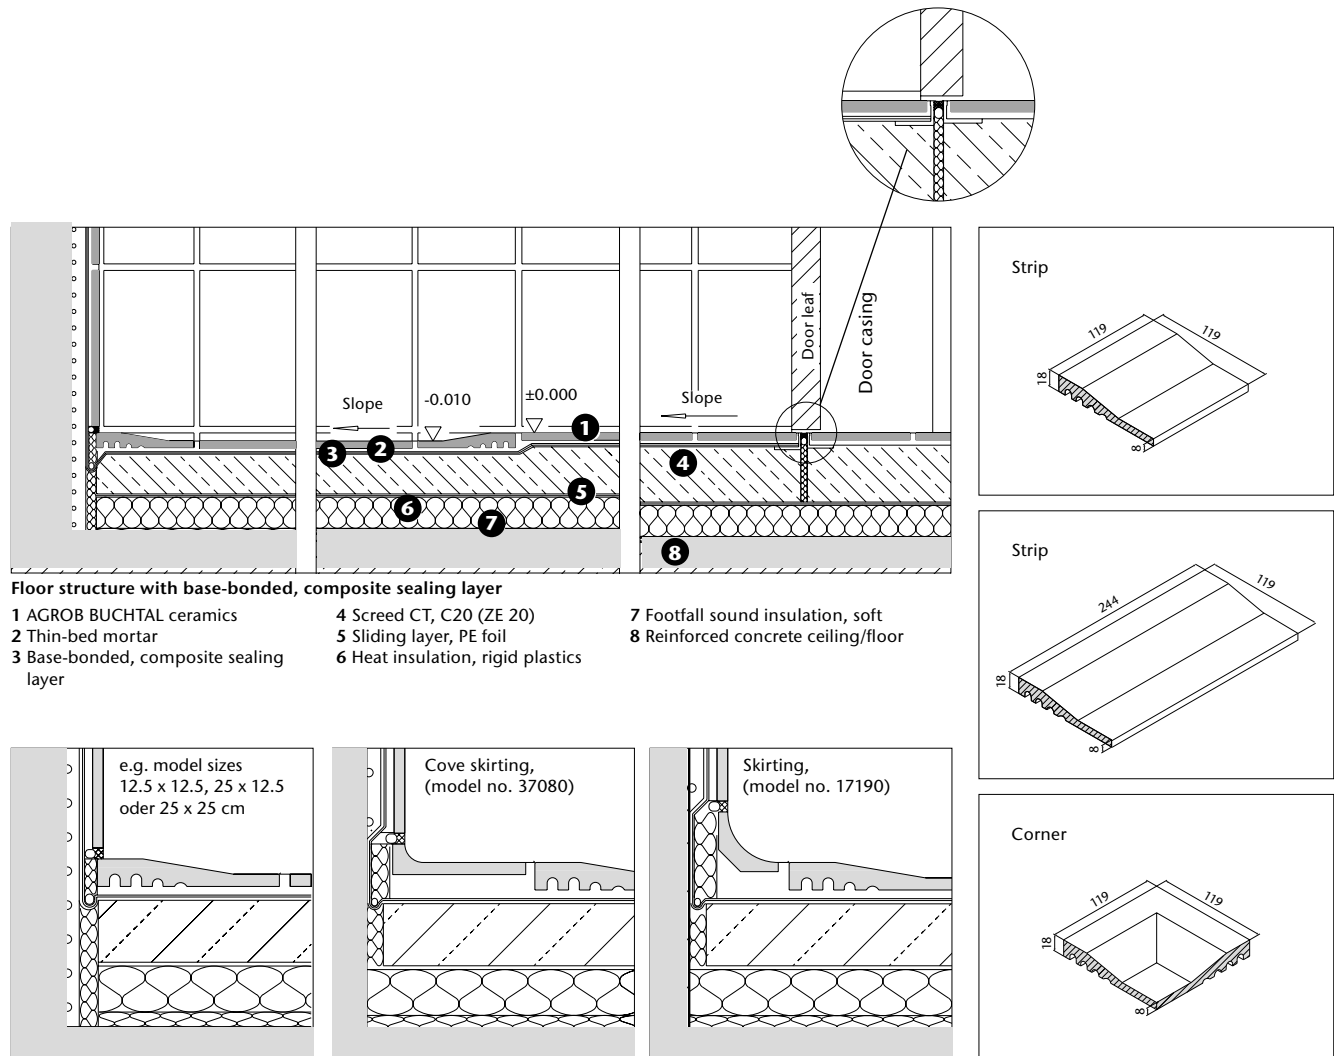

A peculiarity of the system is the special form of the slope which provides a difference in height of 10 mm. The edge of the shower tub designed in this manner is easy to pass on foot and with a wheel-chair. The relevant requirements (DIN 18040 or 18025) with regard to barrier-free construction taking into account the needs of senior and handicapped persons are effectively supported in this way.

Thanks to the “integrated slope” the time-consuming execution of the edge of the shower tub on site is no longer required, and together with the even lower side facilitating laying the processing of these tiles is absolutely simple:

The shower tub system is perfectly completed by the series Chroma / Chroma unglazed – Quantum.

The shower tub system is based on a grid size of 12.5 x 12.5 cm. This permits a very variable dimensioning of the shower tub independent of standard dimensions and a harmonious integration in the shower installation or sanitary block.

### Wall connection variants

The shower tub systems of AGROB BUCHTAL are laid on a continuous screed and therefore do not require a high-maintenance movement joint between shower tub and adjoining areas.

All references to as well as quotations from product and test standards are to be considered as information which is not binding. The latest versions apply.

## Cove Skirting

### Cove Skirting 10 x 10 cm

Fitting to:

**Area Pro**, smooth, 10 x 10 cm, unglazed  
**Plural/Plural non-slip**, smooth and slip-resistant, 10 x 10 cm  
**Basis 2**, smooth, 10 x 10 cm, glazed  
**Basis 3**, smooth, 10 x 10 cm, unglazed  
**Plural unglazed**, smooth, 10 x 10 cm

### Cove Skirting 10 x 15, 10 x 20, 10 x 30 and 10 x 60 cm

Fitting to:

**Emotion GRIP**, smooth or Softcorn, 10 x 20, 10 x 30 cm, unglazed  
**Basis 3**, smooth, 10 x 15, 10 x 20 cm, unglazed  
**Basis Pro**, smooth, 10 x 30 cm, unglazed  
**Area Pro**, smooth, 10 x 20, 10 x 30 und 10 x 60 cm, unglazed

### Cove Skirting 10 x 25, 10 x 50 and 10 x 60 cm

Fitting to:

**Ascona**, structured 10 x 25, 10 x 50, 10 x 60 cm glazed  
**Nova**, smooth 10 x 60 cm glazed  
**Quarzit**, structured 10 x 60 cm glazed

### Cove Skirting 12.5 x 25 cm

Fitting to:

**Chroma unglazed**, smooth, 12.5 x 25 cm, unglazed

### Cove Skirting 12.5 x 25 cm

Fitting to:

**Ferrum**, smooth, 12.5 x 25 cm, unglazed

### Internal Corner

Fitting to  
cove skirting:

**Plural non-slip**,  
10 x 10 cm, glazed

Fitting to  
cove skirting:

**Area Pro**,  
10 x 10, 10 x 20, 10 x 30,  
10 x 60 cm, unglazed

**Emotion GRIP**,  
10 x 20 and 10 x 30 cm,  
unglazed

**Basis 3**,  
10 x 20 cm, unglazed

Fitting to  
cove skirting:

**Ferrum**,  
25 x 12.5 cm,  
unglazed

Fitting to  
cove skirting:

**Chroma unglazed**,  
12.5 x 25 cm, unglazed

External corner

Fitting to cove skirting:  
**Plural non-slip**,  
 10 x 10 cm, glazed

Fitting to cove skirting:  
**Area Pro**,  
 10 x 10, 10 x 20, 10 x 30,  
 10 x 60 cm, unglazed  
**Emotion GRIP**,  
 10 x 20 und 10 x 30 cm,  
 unglazed  
**Basis 3**,  
 10 x 20 cm, unglazed

Fitting to cove skirting:  
**Ferrum**,  
 25 x 12.5 cm,  
 unglazed

Fitting to cove skirting:  
**Chroma unglazed**,  
 12.5 x 25 cm, unglazed

Cove skirtings, cut/glued 15 x 60 cm and internal corners 15 x 15 cm

Details: Can be manufactured from any tiles/panels. The look and the haptics correspond to those of the adjoining surface, i.e. both the same structure and the same color are guaranteed. Minimum order quantity for the skirtings: 50 pieces; corner: 50 pieces.

Cove skirting

Corner

Scale 1:5

- 1 UW Silicone
- 2 Closed-cell PE foam cord or separating foil
- 3 Water-resistant elastic filling material
- 4 Heat insulation, rigid foam
- 5 Footfall sound insulation, soft
- 6 Mortar / adhesive
- 7 Sliding layer, PE foil
- 8 Thin-bed laying on rendering
- 9 Base-bonded sealing layer
- 10 Solid backfill

### Stair safety borders / stair tiles

Stair safety border

Patio tile with rounded edge on one side

Patio tile step with nosing as corner solution

Patio tile with rounded edge on one side and grooves

Patio tile with rounded edge on one side and grooves as corner solution (2 pieces)

Patio tile step with nosing

### 1. Construction Products Regulation (CPR)

The CPR distinguishes itself from the previous Construction Products Directive (CPD) above all by the Declaration of Performance, CE marking as well as assessment and verification of the constancy of performance of the product concerned.

Construction products brought into circulation after 1 July 2013 must comply with the CPR. "Bringing into circulation" means that a construction product is made available on the European market for the first time by the manufacturer. We would like to point out that the term of "provision" is delineated from that; it means the passing on of a construction product brought into circulation in the supply chain, e.g. from the specialist tile trade to end consumers.

Essential characteristics of a construction product – here ceramic tiles – are defined in Annex ZA of the harmonised standard DIN EN 14411.

### 2. CE marking

With the CE marking, the manufacturer indicates that it assumes responsibility for the conformity of the construction product with the performance stated in the Declaration of Performance as well as compliance with all relevant European legal regulations.

Furthermore, it is responsible for making sure that the CE marking is applied to the actual construction product, to a label or on the packaging. The CE marking is the sole conformity identification for all essential characteristics of a construction product. Additional marks may only be used for aspects which – in our case – are not regulated by DIN EN 14411.

### 3. Declaration of Performance

As of 1 July 2013, every manufacturer is obliged to establish a Declaration of Performance for each of its construction products. It thereby assumes responsibility for the conformity of the construction product with the declared performance. The Declaration of Performance replaces the former Declaration of Conformity.

The technical documentation of the manufacturer serves as basis for the Declaration of Performance. Among other things, it includes the results of the in-plant production controls such as e.g. initial tests.

The Declaration of Performance has to be provided with an arbitrary reference number by the manufacturer to which the CE marking refers, thus permitting unambiguous identification of the construction product.

The Declaration of Performance can be made available in printed or electronic form (e.g. by e-mail, CD or USB stick).

In addition, the Declarations of Performance for the construction products of AGROB BUCHTAL GmbH are to be found at [www.agrob-buchtal.de/leistungserklaerung](http://www.agrob-buchtal.de/leistungserklaerung). Alternatively, you can scan this QR code:

Project: Alsterschwimmhalle / Location: Hamburg, Germany / Architect: gmp Architekten, Hamburg, Germany / Series: Chroma / Photo: Jochen Stüber

The programme of delivery contains all information about architectural ceramics

**Easy to find**

Each individual series is always represented as follows:

- Color chart
- Short description
- Product specifications

- 1 **Series name;** sort of material (see page 279) and relevant product standard (see page 280)
- 2 **Schematic arrangement of the models** from left to right: Standard models from small to large: in the case of extruded split tiles, at first rectangular and then square models from small to large, fittings/special pieces
- 3 **Peculiarities** of the model
- 4 **Model number** (only in the case of extruded split tiles)
- 5 **Nominal dimensions** = work size + recommended joint width in centimetres and inches  
**Work size** = only material dimensions without joint
- 6 **Surface quality**
- 7 **Logistic product specifications**
- 8 **Product standard**
- 9 **Slip-resistance classification:**  
Barefoot areas/public and industrial areas (see pages 252 - 253 and 286 and the following)
- 10 **Stress groups 1-5;** orientation help for the industrial and commercial sector (see pages 281 - 282)
- 11 **Article number**
- 12 **Abrasion**  
In the case of glazed materials according to stress groups 1 - 5; (see pages 282 - 283)
- 13 **Designation and/or number of color**
- 14 **Price group** (pricing unit in brackets)
- 15 **Color Shade Variation**  
("Color shade variation" refers to the variations in color between the tiles of a certain color, i.e. the degree of shading. Our products are classified into 4 shading coefficients.)

- V0** No variation / no play of colors
- V1** Low variation / low play of colors
- V2** Medium variation / medium play of colors
- V3** High variation / high play of colors
- V4** Strong variation / strong play of colors

**The following symbols are used:**

-  Hytect<sup>®</sup> Hytect surface (for description, refer to pages 8-9 and 285)
-  Protecta surface upgrading (for description, refer to page 285)
-  Novelties
-  no shodfoot traffic
-  Rectified
-  Conically rectified
-  Rectified wall tiles with rounded/ground edges
-  Make-to-order production: return and/or cancellation of ordered products not possible
-  Orientation aid for the blind analogue to the requirements of DIN 32984
-  Frost-resistant
-  **R9** Slip-resistant
-  **B** Slip-resistant / Barefoot areas
-  Made in Germany
-  Glued thermoplastically
-  also available in other colors
-  6 mm tile
